News Notes

Returned to good old Raymond from Los Angeles, C. H. Walton who went from here about 2 years ago to improve his health. We all welcome him back.

The adjuster who was here last week awarded the Rex Theatre manager full insurance on the loss sustained by fire some days ago.

With the acquisition of a lease on the fair grounds by the local golf club the field has been laid out with a six-hole course and work on the greens will soon be finished ready for play. Those who desire to become members should see the secretary, T. L. Halpin at the Standard Bank.

New garages were built last week by Dr. G. W. Leech and Mayor P. W. Cope.

Mr. Kidney of the Department of Municipal Affairs, Edmonton, was a visitor at the local town office this week.

The osmose sugar run at the local factory finished this week.

Frank Hall has purchased a used Ford truck from Graham Motors.

Delvin Bennett now drives a new Chevrolet truck purchased from Graham Motors.

H. S. Allen has purchased a new Chevrolet coupe from Graham Motors.

Oil Field Here?

That Raymond is situated over an oil field is firmly believed by Mr. Emil Weed. He believes it to such an extent that he is willing to back his belief with a sizeable sum of cash in the event that it is possible to form an oil company here. At the next meeting of the Board of Trade he will present his ideas with a suggestion that a geologist be employed to look over this district. A number of men have already offered to buy stock in such a venture. It would be somewhat strange if, after all these years, we were to suddenly discover that we are over an oil field, but stranger things have happened. Mr. Weed has studied geology to some extent himself, and evidently has good reasons for his belief. In any event, it is worth the attention of the board of trade, and it would do no harm to have the opinion of an expert on the matter. If there is a possibility of oil being found in this section this town should know about it.

BORN—A daughter to Mr. and Mrs. Fred Ralph.

Mrs. McDonald, (nee Leah Hicken) of Medicine Hat, is visiting relatives here.

C. W. Brewerton returned last Friday from a visit to Shelby.

Claude Wing and family left Wednesday for Oklahoma, where they will make their future home. Mr. Wing's health required a change of climate.

Railway Construction in the West

Only a few years ago there was a feeling throughout Canada that the construction of railways in the Dominion had been rather overdone. This opinion was freely stated by many men in public life, by bank presidents and financiers, and found expression in newspapers all over the country. The statement was frequently made that Canada had built railways fifty years in advance of the time when they would be needed and the population and productive capacity of the country warranted. The greatest financial danger confronting the Dominion, it was alleged, was its heavy commitments on account of railways.

The fact that Canada possesses the greatest railway mileage per capita of any country in the world, and the further fact that a few years ago during the war the Canadian Northern, Grand Trunk and Grand Trunk Pacific Railways got into financial difficulties and had to be taken over by the Dominion Government, and that for some years following during the post-war depression the Canadian National was operated at a heavy financial loss, no doubt accounted for these rather pessimistic views. An entirely different opinion exists today.

When the C.P.R. was first projected the same faint-hearted views prevailed. The idea of a transcontinental railway across Canada from the Atlantic to the Pacific, crossing thousands of miles of undeveloped prairie land and over the Rocky Mountains, was ridiculed in the English press as the dream of madmen, and even in Canada it was predicted that such a railway would never earn the cost of its axle grease. The world realizes today how false all these dire predictions have proven to be.

The opinions expressed only a few years ago during the anxious days of the war and the world depression which followed are proving to be equally erroneous.

In a most instructive address before the Canadian Club at Regina recently Mr. Cyril Young, of the Industrial Development Department of the Canadian National Railways, stated that for hundreds of miles along the main line of the new transcontinental, through the clay belt of Ontario, the railway was earning an operating surplus, while bringing about settlement and building up important industries, giving to Canada what heretofore it has lacked, depth in addition to its immense width.

In the past, Canada has boasted of its boundaries resting upon two oceans, east and west. Now, with the rapid pushing forward of the Hudson Bay Railway, Canada looks forward with eager anticipation and confidence to the day not far distant when its commerce will likewise pass through a third ocean on the north. And even before that railway is completed to tide-water, a branch line is being rushed to completion in order to handle the enormous traffic which will result from the development of the Flin Flon and other mining areas of the north which, it is predicted, will rival the richest mineral areas in the known world.

Today, instead of believing that railway construction has been overdone in Canada, the two great railway systems of the Dominion are steadily increasing their construction programmes. Last year Parliament authorized an extensive branch lines construction programme for the Canadian National, largely in Western Canada, and providing for the building within three years of some hundreds of miles of new railways. That work, which was started last year, is to be pushed with vigor during 1928.

Nor does the C.P.R. lag behind. The annual report of that Company issued last month records the fact that during 1927 no less than 203 miles of new branch lines were graded and track laid on 170 miles, while for the year 1928 the directors recommend the building of no less than eleven extensions in the provinces of Alberta and Saskatchewan involving the construction of an additional 247 miles of new lines.

Not to be outdone by the West, the Ontario Government is steadily pushing its system northward towards Hudson Bay, while branch feeders are spreading out into districts where mining developments are taking place.

The Government at Ottawa is confronted with applications for new railway charters for lines in northern Saskatchewan, Alberta and British Columbia aggregating thousands of miles with a view to providing for the opening up and development of the north country and the creation of new outlets to the Pacific.

These are the answers now being given to those who predicted disaster for Canada on account of its railway construction of a few short years ago. Take Saskatchewan as an example. Youngest among the provinces it already enjoys a railway mileage second only to that of Ontario, and during this year of 1928 work will be in progress upon approximately 500 miles of new branch lines, not including the Hudson Bay Railway and the Flin Flon branch, both of which will directly serve the Province.

And as if to provide the final answer to the faint-hearted of a few years ago, the Canadian National has turned its operating deficits into substantial operating surpluses, surpluses sufficiently large to meet all the interest payments on bonds and debentures held by the public, while, through the encouragement given to settlement and industrial development all over the country, the Federal Government is receiving a substantial, albeit indirect, return for the money Canada has invested in that system.

Railway development, past, present, and future, is the foundation upon which Canadians are erecting a strong, prosperous, and ultimately self-contained nation, a nation that is destined to occupy a place in the very front rank of world powers.

The first known deposit of helium gas in Europe has been found at Russelsheim, Baden, in Germany, 600 meters under surface.

A motoring journal suggests that the radiator should be more artistic. After all, it is often the first thing about a car that strikes you.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Western Canada Livestock Union

Annual Convention For 1928 Will Be Held At Edmonton

The 1928 annual convention of the Western Canada Livestock Union, will be held in Edmonton, It was decided at the recent session of this organization, which was held in Vancouver, R. A. Wright, of Drivewater, Saskatchewan, has been re-elected president of the organization for the coming year, J. L. Walters, of Olive, is the provincial vice-president for Alberta, Olaf Olafson, of Mortlach, occupies the same position for Saskatchewan, and George Gordon, of Oak Lake, for Manitoba. C. M. Leinmonth, of Regina, continues as secretary of the Union for 1928.

A SPRING TONIC AN AID TO HEALTH

You Can Lay the Foundation Of Good Health Now By Building Up Your Blood and Strengthening Your Nerves Through the Use Of Dr. Williams' Pink Pills.

The good old fashion of taking a tonic in the Springtime, like most of the customs of our grandparents, is based upon sound common sense and good medical principle. Winter is always a trying time for those who are not in rugged health. Many men, women and children go through the winter on reserve strength they have stored up during the sunny summer months, and grow increasingly pale and languid as the spring days approach. A tonic for the blood and nerves at this time will do much for such people, by putting color in the cheeks and banishing that tired feeling that worries thousands of people at this season of the year.

It is impossible to be energetic if your blood is thin and weak, or if your nerves are frayed or shattered. You cannot compete with others if you do not get refreshing sleep at night, or if your appetite is poor or you are losing weight. You need a tonic at this time to add to your efficiency now, as well as to save you from suffering later on. And in all the realm of medicine, there is no safer or better tonic than Dr. Williams' Pink Pills. These pills tone and enrich the blood which circulates through every portion of the body, strengthening tired nerves and run-down organs, and bringing a feeling of new strength and energy to weak, easily tired, despondent men, women and children.

Mrs. L. Hupman, Shumerville Centre, N.S., writes:—"Dr. Williams' Pink Pills have been of the greatest benefit to me. A few years ago I was in a badly run down condition, I became so weak and nervous that I could scarcely go about and doing my housework left me completely used up. Everything seemed to worry me, and I was in a very discouraged condition when I began taking Dr. Williams' Pink Pills. I soon found the use of I fully regained my health. Since then I always take a few boxes in the Spring to build me up for the hot weather, and always I find the best results. I therefore cheerfully recommend these pills as the best of health builders."

You can get these pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Growth Of Catholic Church

Catholics In United States Now Total Nearly Twenty Million

There are 19,689,409 Catholics in the United States, the official Catholic directory for 1928 shows. This is an increase of 205,753 over last year.

The total of Catholic churches in the U.S. was listed at 16,263, with 23,773 priests. Of the latter, four are cardinal-archbishops, thirteen archbishops, and 91 bishops.

A Foe To Asthma. Give Asthma half a chance and it gains ground rapidly. But give it repeated treatments of Dr. J. D. Kellogg's Asthma Remedy and it will fall back even faster. There is no half way measure about this remedy. It goes right to work and drives asthma out. It reaches the innermost breathing passages and leaves no place for the trouble to lurk. Have it by you for ready use.

Heavy Apple Production In Okanagan

It is estimated that there will be an apple production of 1,075,000 boxes in the southern part of the Okanagan Valley, British Columbia, this year. The estimate is based on present excellent prospects, all conditions in the orchards being of a favorable nature. Peaches, apricots and cherries also give promise of heavy yields.

Theatres and movie houses of New York have 1,600,000 patrons daily. There are 208 theatres and 580 movie houses with a seating capacity of 858,972.

People used to think the world was flat. Then it was found to be round. But it's still just a little crooked in spots.

In parts of North Siam both parties to a lawsuit are put under water, and the one staying under the longest wins the suit.

SUNDAY SCHOOL LESSON

APRIL 15

TRANSFIGURATION AND SERVICE

Golden Text: "He that abideth in Me, and I in him, the same beareth much fruit; for apart from Me ye can do nothing."—John 15:5.

Lesson: Mark 9:2-29.

Devotional Reading: John 15:1-8.

Explanations and Comments

The Transfiguration, verses 2-8. — Six days after Peter's expression of his conviction that Jesus is the Christ, Jesus took Peter, James, and John apart from the rest and ascended a high mountain where he was transfigured before them. The other disciples may have been too superstitious or too dull of comprehension for such a revelation of His glory.

"The longer we live the more profoundly we believe that no one has actually more than two or three friends. He is a friend—and only he—to whom you can lay bare your heart without the pledge of secrecy. The real friend is interested in you—your joys, your triumphs, your failures become his very own."

Luke 9:20 says that the fashion of His countenance was altered; Matthew 17:2 says "His face did shine as the sun," "The glory of the Godhead burst through the veil of the flesh." "It was not a splendour that fell on Him from without, and lighted Him up; the glory came from within; it corresponded to something going on in His mind."—Davidson. It was as He prayed, Matthew and Luke tell us, that this transformation took place. The story is preceded and followed in the Gospels by Christ's predictions of suffering, death, and resurrection. The Transfiguration was a preparation for the events so near at hand.

"On that mountain, He laid Himself like another Isaac on the altar, and he knew that the sacrifice would be demanded. The very glory of the event contains a hint of the struggle which had been going on in His mind. He was no impassive hero of a romantic history; He was a Soul in the agony of a momentous spiritual transaction. The hour had come when He was to make a voluntary dedication of Himself for a sacrifice than which history knows no sublimer; and the self-consecration was destined to be met by a distinct communication of divine approval. As He was praying about His Passion he entered into the ecstasy of oneness with the heavenly Father; in the heart of Jesus all the holy resolutions of a lifetime were encouraged and strengthened, as the fashion of His countenance became changed."

Songs Longest Remembered

Not in Long Program But Those Heard By Chance

Let any man shut his eyes and remember the occasion when he was most moved by music. How many of those occasions were concerts in large halls or moments at musical parties. And how many were chance songs in the streets of his home, or a blend of voices on a lake at night, or a chorus in some mountain hostel? A long program of music is like a large gallery of pictures or a museum full of sculpture. It defeats its own purpose. A tune or a picture should be a full meal for the soul, the effect of which will only be spoiled by over-eating.

The ease with which corns and warts can be removed by Holloway's Corn Remover is its strongest recommendation. It seldom fails.

Recipes For This Week

(By Betty Barclay)

DINNER PAID DELIGHT

- 1 cup sugar.
- 3 cups flour.
- 2 teaspoons baking powder.
- Pinch of salt.
- 1/2 cup shortening.
- 1/2 cup nectar raisins.
- 1/2 teaspoon cinnamon.
- 1/2 teaspoon nutmeg.
- Sift flour, sugar, baking powder and salt together; add other ingredients. Then add enough water to make a paste. Roll out on board, cut with biscuit cutter and bake 15 minutes.

CHOCOLATE FUNKET

- 1 jacket tablet.
- 1 pint milk.
- 2 squares chocolate.
- 3 tablespoons sugar.
- 1 teaspoon vanilla.
- Heat the milk until lukewarm; add the sugar, stir until dissolved. Melt two squares of chocolate in a half cup of the warm milk and boil a moment; add to it carefully the remainder of the milk, the vanilla and the dissolved tablet; stir and pour at once into dessert glasses. Serve with sweetened cream or custard sauce.

The normal atmospheric pressure on the body at sea level is 14.7 pounds per square inch.

Were it not for a man's faults he might live and die without ever hearing his name mentioned.

Minard's Lintment for cuts and bruises.

THE EXTRA STAMINA You Need For Spring Driving

Equipping with Gum-Dipped Tires is an investment in extra safety, speed, comfort and economy. That is why thousands of motorists throughout the country use these tires.

On wet, slippery streets and highways—around sharp turns—maneuvering in and out of traffic—stopping suddenly—you can always depend on the powerful Firestone non-skid tread to hold without slip or skid.

Supporting this safety trend is the special Gum-Dipped carcass, built of cords dipped in a rubber solution which saturates and insulates every fibre of every cord with rubber. This minimizes the friction and heat of high speed service, and strengthens the whole structure of the tire to withstand heavy strains.

Your local Firestone Dealer will serve you better and save you money. See him today.

Canada's Water Power Resources

Of the 11,911,939,000 kilowatt hours of electricity generated in Canada last year, almost 99 per cent. of the total was hydro-electric. Fuel plants generated only 1.4 per cent. It is estimated that the water power of Canada would warrant the installation of about 43,000,000 h.p. At present only 4,883,266 h.p. is under installation for electric power.

The Oil For the Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mother who suffers from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

Sheffield, which now has a population of 500,000, was once a little Norman settlement and later a pleasant country place.

The Farmyard Hen Produced In Canada Last Year Over 253 Million Dozen Of Eggs

Some one has figured that if the eggs laid in Canada in 1927 were placed end to end they would girdle the universe four and a half times. It certainly staggers the imagination to comprehend over three million eggs or 115,000 miles of them. And these are the farm eggs only. Dear knows how many more thousands of miles should be added for the eggs laid in poultry houses in the cities and suburban areas in Canada, but the number must be considerable. All of them, whether from farm or city, disappear down the national gullet at the rate of 6,000 per minute. The rate is of course much faster at meal times, for these figures are on a 24-hour basis. Still there are not enough to satisfy the national appetite and some eggs have to be imported into Canada.

Canadians are the greatest egg-eaters on the face of the globe and consumption has been increasing tremendously, especially since egg-grading regulations came into force. It is estimated that Canadians now consume something like 337 eggs per capita per annum. Production of farm eggs in 1927 equalled 320 eggs per capita. While production is increasing rapidly, principally through the breeding of better hens rather than increasing the flocks, consumption is increasing at a still more rapid rate as indicated by the excess of imports over exports of eggs.

Canada imported roughly 3 1/2 million dozen eggs in 1927, and exported less than half a million dozen. Excess of imports over exports rose by a million dozen over the previous year. These are figures on eggs in the shell. Eggs other than in the shell or n.o.p. as they are shown in trade statistics, are also imported into Canada in some volume, especially in recent years. Most of the eggs in this class come from China and the total amount imported in 1927 amounted to slightly over 2 million pounds, compared with 1.3 million pounds in the previous year.

The unfavorable trade balance resulting from excess of imports over exports of eggs amounted to roughly \$1,700,000 in 1927. This is an increase over 1926 of upwards of a million dollars. Considered by themselves these figures may appear large but they fade away by comparison with a farm egg production in 1927 of over 253 million dozen valued at over \$80,000,000. The long and short of it is that Canada just barely failed to meet her egg requirements last year by about 3 1/2 in-the-shell eggs per capita to which must be added the importations of preserved eggs amounting to perhaps two eggs per capita. Domestic egg production failed to meet the national appetite therefore by roughly one-half dozen per capita—a trifling amount. It is true, but the shortage is increasing.

What is the outlook? Can Canada meet her own egg requirements in the future? Can she regain her lost export trade in eggs? In regard to the first of these questions, farm egg production is increasing very rapidly, in fact there has been a gain of fifty per cent. since 1921. In the same time the number of hens etc. on Canadian farms has increased by only 25 per cent., showing that the production per hen has increased considerably since 1921, due to the rearing of better birds for egg-production. The process of weeding out undesirable birds and substituting hens of proven high-production strain appears to have borne excellent results in the past year, an increase of 6.8 per cent. in production being recorded for 1927 over 1926, while the number of hens etc. in farm flocks increased by only one-sixth of one per cent. Even without increasing the farm flocks the industrious biddies of 1927 just about kept up with increasing population and the increasing appetite of Canadians for eggs. There is still room for very great improvement in the farm flocks from the egg-production standpoint, but the process cannot go on indefinitely and the farm flocks must eventually be increased to keep up domestic supplies of eggs. If consumption per capita goes on climbing.

If Canada had the eggs, she could no doubt find a market for them in Great Britain, says the Department of the Interior, through its Natural Resources Intelligence Service. In fact the market for her surplus eggs has always been there, but since 1902 the exportable surplus has never amounted to much. But just imagine the magnitude of the market in the United Kingdom and what could be done with poultry in Canada if prices were attractive. The United Kingdom spent over \$80,000,000 a year on im-

ported eggs in 1925 and 1926. The Imperial Economic Committee reports that requirements from home and Empire sources are 5,700 million eggs a year or 475 million dozen—nearly twice Canada's farm egg production—this with a consumption of only 135 eggs per capita. The system of uniform grading and government certification to which they have been subjected has enabled Canada's eggs to command a premium over all other eggs on the British market. If enough of them were to be had, John Bull might contest Jack Canuck's title to champion egg-eater of the world. But as it is only 5 out of every thousand eggs consumed in Great Britain, according to last reports, come from Canada. The United Kingdom itself supplies 433; Irish Free State, 95; China, 135; Denmark, 121; Russia, 47; Netherlands, 35; Poland, 22; Egypt, 22; Belgium, 21. South Africa supplies 5 and Australia 3, so that Canada does not rank behind the other British Dominions, but what a big thing it might be for Canada if she could get a big slice of this egg trade and especially if consumption per capita increases as it has in Canada.

Good Future For Prince Rupert

Will Soon Become Important As a Grain Shipping Point

In a speech delivered at a banquet of Prince Rupert pioneers, Mr. McMorris, mayor of the city, regretted that he could not divulge the result of his recent visit to Ottawa until he had submitted a formal report to the Council, but he assured the gathering that the pioneers had made no mistake in establishing themselves in Prince Rupert. He predicted that within two years at least twenty million bushels of grain would be shipped overseas through Prince Rupert Port, and within the next ten years, all would be amply recompensed for their unswerving faith in the future of the city.

1721

Exceedingly smart is the modish dress shown here, consisting of a tunic blouse and a separate slip. The loose sleeves are finished with shirred bands, the removable belt is fastened at the front with a buckle, and the tie-strings are attached at the shoulders. No. 1721 is in sizes 16 years, 36, 38, 40, 42 and 44 inches bust. Size 38 requires 4 1/2 yards 40-inch printed material, and 1 1/2 yards 40-inch plain. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical style, will be of interest to every home dress-maker. Price of the book 30 cents the copy.

INTELLECTUAL BRITAIN

The Influence Of Environment In Racial Development

John Bull takes his place among the highbrows. Professor D. G. Parsons, English anatomist, says that for the past hundred years the skulls of his fellow-countrymen have been increasing in length and height. He adds that "this is a change which can be attributed only to environment, since it is repeating no known ancestral shape." The discovery is regarded as of sufficient importance to be laid before the Royal Anthropological Society. In such impressive fashion are we given to understand that the highbrows of today are the descendants of the lowbrows of yesterday. And we are told further that "the discovery of this growth upward is a strong argument for the influence of environment in racial developments and undermines faith in craniology as a guide to racial relationships."

Information is not at hand as to how Professor Parsons reached his conclusions. Was it a case of actually measuring the skulls of the departed, thus giving the lie to the assertion that dead men tell no tales? Did the anatomist carry science to the portraiture gallery? Or was the hatters' guild asked to supply figures for use in the comparison? It is conceivable that the size of grandfather's hat might play its part in the undermining of craniology as a means of determining racial relationships.

But however the result was obtained, there is reason for rejoicing because of it. It is gratifying, everywhere but in Chicago, to be told that the English are becoming highbrows. But the information is, of course, to be understood as applying to the general. There were highbrows in Merry England in the brave days of old. No communication to the Royal Anthropological Society will cause Francis Bacon, John Milton and Shakespeare to be numbered among the lowbrows. —Boston Transcript.

Manitoba Mine Is Gold Producer

The Central Manitoba Mines have shipped 3 gold bricks since the mill began running a few weeks ago. Development work continues and ore reserves now in sight are sufficient to supply present capacity for three years. The ore is improving in quality with depth. T. C. Anderson, vice-president, states. Exploration with diamond drills is in progress on sections of the property that have not yet been opened up.

Speed Of Radio

If a bullet from a modern high powered rifle did not lose its speed, it could travel around the world in a little over 15 hours; while the impulse from radio-sending station would cover the same distance in less than one-seventh of a second.

Thermometers sent up in experimental balloons have noted a slight rise in temperature beyond the altitude of 6 1/2 miles.

IS VAST ORGANIZATION

Upkeep Of London Hospital Costs Million and a Quarter Dollars Yearly

"The Prince of Beggars" has made what he thinks may be his final appeal. In the last 30 years he has begged from the public many millions of dollars, and he is still asking for more. Surely, therefore, he deserves the title which the newspapers have bestowed upon him. "Deserved" is the right word, for he has begged wholeheartedly in a good cause—the cause of suffering humanity.

Viscount Knutsford is chairman of the London Hospital, the largest hospital in this country, which needs an income of over a million and a quarter dollars yearly for its upkeep. It was founded in 1740 with a subscribed fund of 100 guineas, and soon afterward the secretary had the unpleasant duty of informing his committee that they had just one shilling left in the bank.

But the hospital survived the crisis, and in the course of the ensuing 185 years has developed, after many trials and tribulations, into the present vast organization.

The London Hospital has eighteen operating theatres, fourteen special departments, a laundry that washes 3,000,000 pieces a year, four convalescent homes and surgical annexes, a nurses' training school, a medical college and laboratories and equipment as complete as money and brains can provide.

Such a huge institution, run on the voluntary system, with its doors thrown open generously to every sufferer from every disease, needs a huge income; and it is due mainly to the mendicant proclivities of "the Prince of Beggars" that it has been able to carry on its great work.

Becomes Paying Industry

Texas Oil Workers Make Money Selling Rattlesnake Skins

Dame Fashion has interfered with a pastime of workers in the oil fields of West Texas.

Men who work about the derricks once delighted in tossing sticks of dynamite or small cans of nitroglycerine into dens of rattlesnakes. But fashion decries snakeskin shoes and gave the reptiles a commercial value. So the workmen, who have been none too prosperous because of the slump in the oil industry, now drag the snakes from the dens with hooked poles and collect the skins, which are dried in the sun and shipped to shoe manufacturing centres where they bring price which nicely augment the wages of the laborers. Several hundred rattlesnakes have been found in a single den.

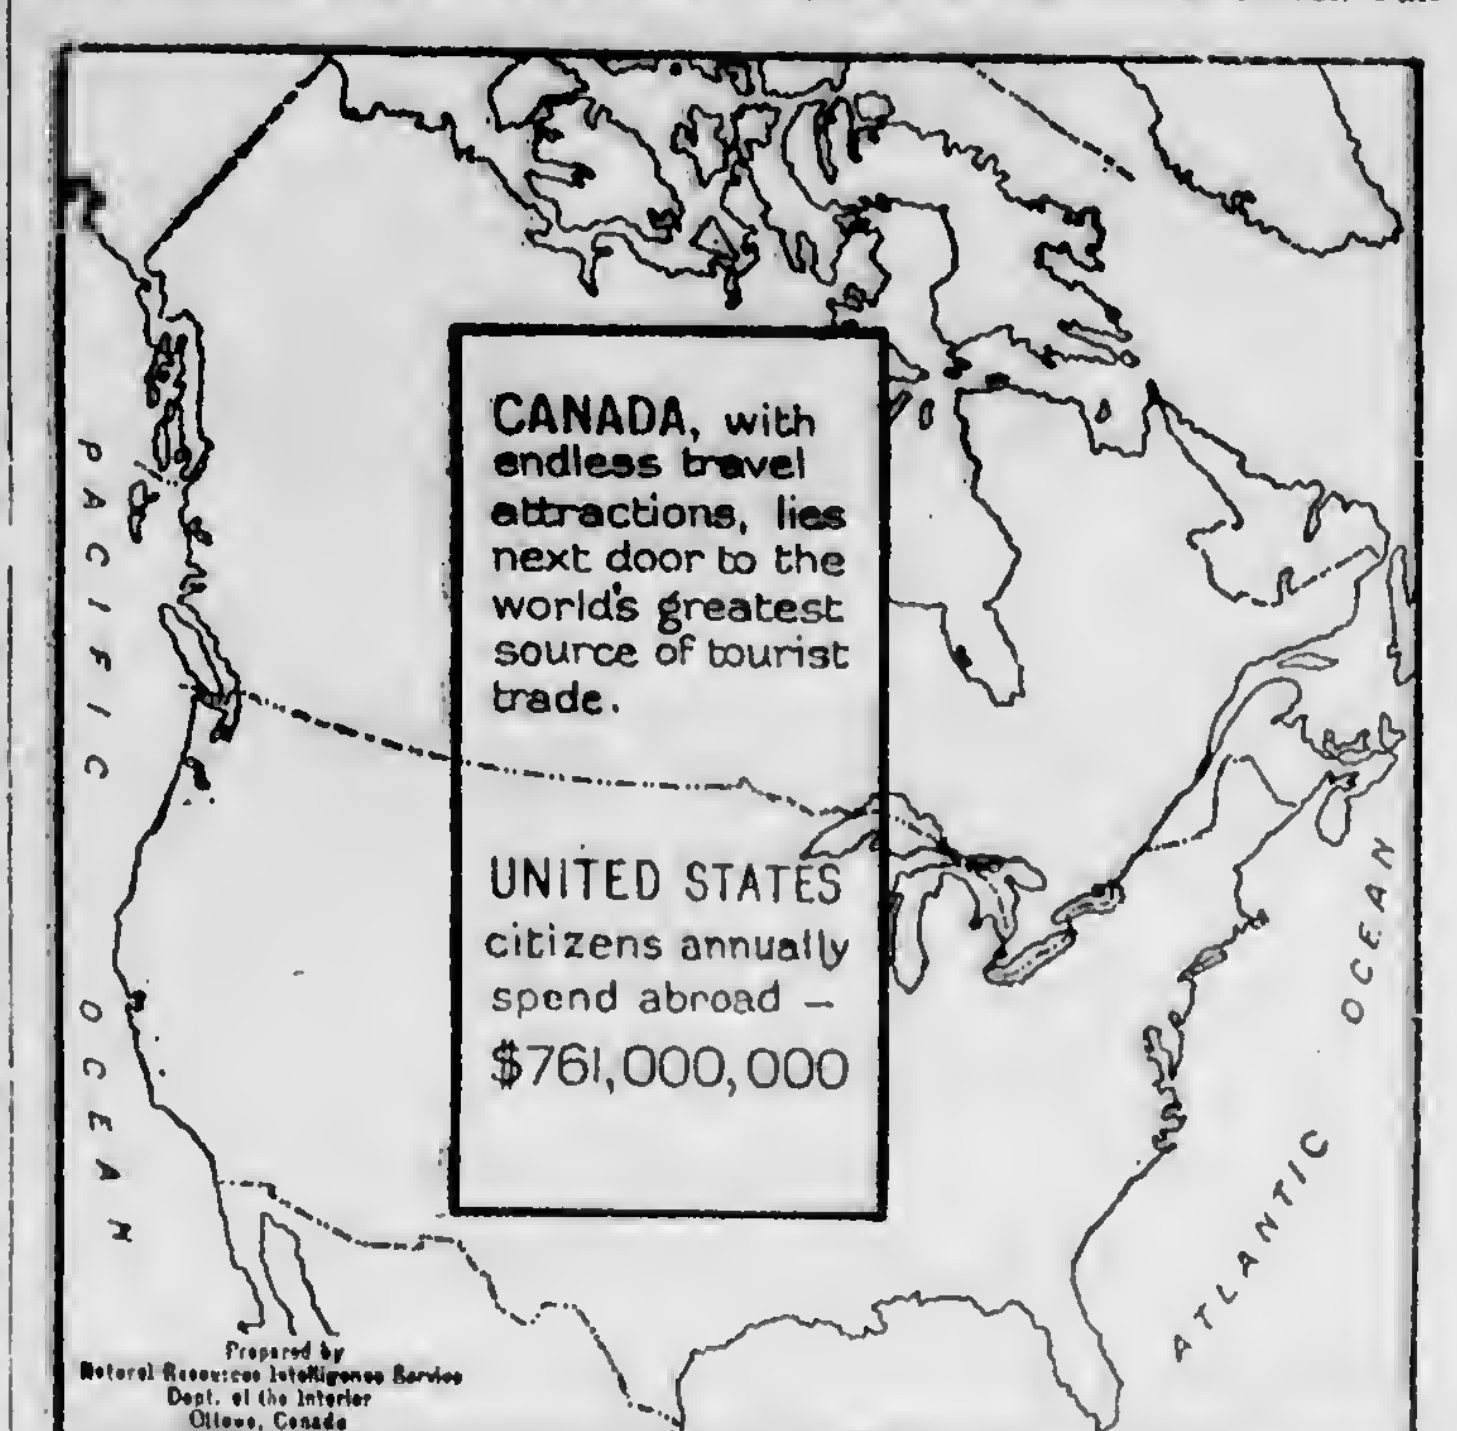

Right At That

To test their knowledge of English the native students in a Chinese Christian college were asked to give in their own language the meaning of certain phrases, including "Out of sight, out of mind." One of them summed up the situation in two words—"Invisible, insane."

Canada's Matchless Advantage In Relation To The Growing Tourist Trade From U. S.

If the volume of United States tourist travel continues to grow at anything like its recent rate, it will be only a matter of two or three years until the amount of money expended by Americans abroad reaches the colossal sum of a thousand million dollars a year. For 1926, according to the United States Department

of Commerce, the outlay of American tourists was roughly \$761,000,000—or nearly twice as much as the Dominion Government collects in tax revenues in an ordinary year. Canada's position in relation to this trade is one of matchless advantage. Already our tourist business represents a big item, the expenditures of tourists in the Dominion amounting,

en all in all, there is probably no other country so favorably situated for attracting tourist trade. The warm welcome which Canadians extend to visitors is an ever-growing influence in directing travel toward the Dominion. Those who come gladly return again and bring their friends with them.—Charles Stewart, Minister of the Interior.

Banting Sweet Corn

New Variety That Matures In Less Than Seventy Days

The new Banting corn originated by the Division of Horticulture of the Experimental Farms System, is proving so valuable in the Prairie Provinces that steps are being taken to produce large supplies of seed. This variety of sweet corn, practically equal to Golden Bantam, becomes ready for use in less than seventy days, which makes it adaptable for general use in the home and market gardens of colder parts of the Dominion. A considerable quantity of seed of the Banting corn was produced at the Morden, Manitoba, Experimental Station last year. This year the stock is to be multiplied at some of the other Western Experimental Stations.

Garden Roses

Five Hundred Varieties Have Been Tested Out In Canada

Roses have been under test at the Central Experimental Farm for forty years, and observations on the relative hardness, attractiveness, blooming season, freedom from disease, and general merits of different varieties have been made and recorded. Some 500 varieties are now being grown in the flower gardens of the farm. The results of these years of investigation are given in a bulletin entitled "Hardy Roses" which is distributed by the Publications Branch of the Department of Agriculture at Ottawa. An interesting list of roses recommended for small gardens is given in the bulletin. They are all varieties which have been grown successfully at Ottawa. Among the roses in the list are three Hybrid Perpetuals of outstanding merit. One, Fran Karl Druschki, is acknowledged to be the finest white rose in cultivation. It is a strong, healthy grower with an abundance of bloom throughout most of the season. Another very popular hybrid perpetual is Mrs. John Laing, a rosy pink, fragrant variety which does well in town gardens. The third variety is the Hugh Dickson, a very attractive crimson, shaded scarlet flower, vigorous, and a free bloomer.

Hybrid Tea Roses recommended are Caroline Testout, a reliable, bright warm pink variety, Gruss and Teplitz, a very fragrant and hardy crimson rose, and La Tosen, a pale pink. Perpetual roses recommended are Mme. Edouard Heriot, a free vigorous bloomer with a wonderful combination of coloring, Souvenir de Claudius Pernet, a beautiful yellow flower, and Willowmere, a hardy, continuous bloomer of unusual color.

B.C. Lumber Production

Lumber production in British Columbia in 1927 totalled 749,230,000 feet board measure, an increase of 27,500,000 feet over 1926. The principal export markets for British Columbia lumber and forest products were the United States and Japan. The value of the lumber production in the province last year is placed at \$82,078,000.

World's Grain Show

Promoters of the proposed World's grain show to be held at Regina, Saskatchewan, in 1932, are forwarding their plans as rapidly as possible. The Saskatchewan legislature and the Regina Industrial and Agricultural Association have endorsed the project, and the federal government will now be approached with a view of getting its approval and support.

C. P. R. Adds Further Trackage

Photos show the huge area covered by the railway tracks of the Canadian Pacific Railway around the harbour of Vancouver, also the new elevators recently constructed.

Over one hundred miles of track-ge will shortly have been laid by the Canadian Pacific Railway in serving the ports of the Vancouver District, is shown by the extent of the works now underway about that city.

An indication of the programme of extension of the already multifold trackage facilities is given in the plans being carried out at Pier B-C at the foot of Granville Street, and in the proposed new C.P.R. yard at the south end of the second Narrows Bridge, and of the allowance for further additions when necessary.

Mr. C. A. Cotterell, C.P.R. General Superintendent, has issued figures demonstrating the vast extent of ex-

istent trackage facilities exclusive of main and subsidiary lines running through the yards for the passage of through and local trains, serving Vancouver and her sister ports.

On the north shore to the south end of the second Narrows Bridge, the C.P.R. has more than 9 miles of trackage. From the south end of the second Narrows Bridge to Coal Harbor are another 27 miles. The False Creek Yard comprises 27 miles, and the south False Creek Yard has between three and four miles. In the Coalition Terminal Yards, serving both Vancouver and New Westminster, there are 22 miles of trackage, with yard capacity for double that mileage should it become necessary.

Another four miles of yard rails lie west of the Fraser River Bridge.

This trackage, so far as the C.P.R. is concerned, is not only taking care of a steady and normal growth in trade through the great port, but also handling an abnormal expansion in westward grain movement. Additions have been made and others will be necessary to care for this growing westbound traffic, which reached a peak in the crop season of 1927-28. The Canadian Pacific's first westward wheat shipments were made in 1922, attained more than 50,000,000 bushels in 1923-24, and reached the record this spring of 53,000,000 bushels shipped through the port before the end of February.

Small Town Papers

BY FRANK PARKER STOCKBRIDGE
Reprinted by special permission from Saturday Evening Post, Copyright 1928, by the Curtis Publishing Company, Philadelphia.

"So they were," he answered. "I was raised on the farm, but I never liked it. That's why I came down to New York in the first place. And when dad died I sold the farm and bought the paper—the old Middleboro Gazette. Couldn't get the string of printer's ink out of my system."

I waited for Bert to go on, but he said nothing more in response to my question.

"I meant your gold mine," I ventured after a moment of silence. "What sort of business have you been in? You seem to have been successful."

Bert looked at me with a puzzled expression, as if he thought I was trying to kid him. "Why, I just told you," he said. "I bought the Middleboro Gazette."

I saw at once that I must have seemed stupid to Bert. Some big industry had picked Middleboro for its plant and made the country village into a big city, as the General Electric did at Schenectady. But for the life of me I couldn't remember which industry it was. Middleboro? I couldn't think of anything to connect the name of the town with. But I didn't let on to Bert.

"Oh, I see," I responded cheerfully. "And as the town grew big enough for a daily you grew with it, eh? Fine! What's your population now, anyway?"

"About the same as it always has been: maybe a little less," he answered. "Around 2,000. But we've got a circulation of more than 3,000. Not so bad for a country weekly, what? Be a long time before Middleboro will need a daily, if any."

"Hold on a minute, Bert," I gasped. "Let me get this straight. You've been right there in Middleboro for twenty years, running a country weekly in a town of 2,000 people, and now you've retired on your income and your wife goes shopping in Fifth Avenue and—Oh, what's the use? I just can't seem to get this straight. If I hadn't known you as well as I used to, I'd think you were trying to put one over on me. Do you mean to tell me that anybody ever made that much money, or any money more than a bare living, and a poor one at that, out of a country weekly? You must have some property besides that, Bert."

"I have now, of course," he grinned back at me. "Naturally I've made investments, same as any business man does with his surplus. I've got a block of stock in the Middleboro National and some shares in the creamery and the cold-storage plant, and a few pieces of business property in the town, and one thing and another of that sort. But it all came out of the Gazette in the first place, and all I had to start with was the \$3,000 mother and I got for the farm after dad died. Of course, I've plowed a lot of the profits back into the paper—have to keep a newspaper plant up to date, you know. It'll inventory now—the plant—around \$25,000, and the building's worth another \$10,000; goodwill and all, I wouldn't take \$50,000 for the Gazette. It earns now around 40 per cent. on that figure, and you've no idea how far \$20,000 a year will go in a town the size of Middleboro."

"I'll go a long way in New York," I conceded. "What's your idea, though, Bert, is the idea that there's any such money, or the half of it, to be made out of any country weekly paper, anywhere, any time. As my old Yankee granddad used to say, it beats my time. You're sure you're making that out of the paper, not out of the job-printing business?"

I must give Bert credit for being good-natured. He always was; and besides, he'd always liked me in the old days and he knew I liked him a lot. Some men would have got mad to be questioned that way, but he knew I was friendly and interested.

"The job-printing business accounts for about a quarter of it," he said, answering my latter question first. "Job printing's a rather item in a modern country newspaper office instead of being the main reliance, as it used to be. It's a specialty that hasn't got anything really to do with making a newspaper. Fact is, my younger boys—they're both with me in the business now, running the shop—the younger one, Joe, has got an idea he could do better with the job plant if he had it out under its own roof, and we're fixing now to incorporate that separately and let him see what he can make of it. But the old Gazette, standing alone on its own hind legs, has pulled down better than \$15,000 a year net for me every year for the past five or six years, and it's getting better all the time."

"Yes, you're right," he went on. "It does beat your time. It's a new thing, this development of the country weekly into a remunerative industry. Instead of a hazardous gamble, with the odds all against the editor and publisher, as it used to be, it wasn't any too easy the first few years I had the Gazette, though I always look down more than I needed to live on right from the start. And it isn't like taking candy from a baby now—got me right on that. A man's got to know the business and work at it same as any other business. But if he does that I don't know any business in the world that'll pay him so big a return on his investment or stand up so solidly under competition from outside or that's so hard to kill."

(To Be Continued.)

WIN
New 1928 Ford Sedan
\$1500.00 in Cash Prizes

PRIZES
FIRST, 1928 Ford Sedan,
Value \$750.00
Second - - - \$250.00 Cash
Third - - - 100.00
Fourth - - - 50.00
Fifth - - - 25.00
Sixth - - - 10.00
Seventh - - - 5.00
Eighth - - - 2.50
Ninth to 26th - - - 1.00 Each
The above prizes are unconditionally guaranteed.

Follow these Simple Rules
1. Write your answers in pen and ink only, on one side of the paper. Put name and address in upper right hand corner stating whether Mr., Mrs., or Miss, also name of this paper. Write anything else on separate sheet. Don't read fancy, drawn, or typewritten answers.
2. Contestants must be 16 years or over.
3. Employees of Banner Hosiery Co. or friends and relatives of employees are forbidden to enter.
4. Three entries may be submitted but only one can win a prize.
5. Different members of a family may compete but only one prize will be awarded to any one household or group.
6. Final awards will be made by a committee of three prominent Toronto business men who are in no way connected with this firm. Their names will be made known to all contestants. Contestants must agree to abide by their decisions.
7. If you find the correct answer to the puzzle you will be awarded 950 points, and we will send you by mail, a simple acting character puzzle game on which you will be awarded all the final points. No points are to be awarded for neatness, handwriting, or general appearance, nor are points to be awarded for orders unless sent optionally in a limited amount to take the place of missing or doubtful answers. You are neither obliged nor required to buy or sell a single thing to win the highest prize.
8. Contest closes 6 p.m., Friday Aug. 31st, 1928. Entries should be forwarded promptly.

How He Did It
"You will notice," the professor told them, "some stars have three points, others four points, some five, or six points, etc. The number of points each star has determines what letter of the word of the message that star stands for. For instance if a star has three points it is the letter n. However, if it has four points it is either d, a, or f. Some stars represent only one letter, some 2 letters and some 3 letters. I have worked out the table code for you, now you count the number of points on each star and try to find what letter each star stands for, by referring to the table code. I have correctly arranged the stars so that each row of stars spells a word of the message. In order to help you a bit the first word is 'Greatest'."

**Solve This Puzzle
Win First Prize**
If you can solve this puzzle, send your answer in pen and ink to the Banner Hosiery Co., 1028 Ford Sedan First Prize. While your answer is on a piece of paper in pen and ink.

THE OBJECT OF THE CONTEST.
Nothing to Buy or
Sell. No Money to
Spend.

Frankly, this is an advertising contest. Its object is to get a wider distribution for the Banner Money saving hosiery and underwear catalogue, listing three hundred quality items at direct to consumer prices. When we receive your answer to the puzzle, we will write and tell you how many points you have gained towards first prize and will send you a copy of our latest catalogue right away. You can enter and win the highest prize without buying a single thing, selling anything, or spending a cent of your money. You will be under no obligation whatever to make a purchase to obtain standing for first prize. Send your answer at once.

Banner Hosiery Company, Ltd. Dept. 97, Toronto, Ont.

Passenger Train Crashes Through Quebec Bridge Weakened By Floods

Quebec, Que.—A Canadian National passenger train was wrecked and two men are missing as a result of flood conditions in the northern part of this province. The engine and baggage car of train No. 45, which left Quebec at 1.20 p.m. Sunday afternoon, crashed through Drummondville Bridge, which had been weakened by flood waters. The missing men, believed to have been killed, are Joe Robin, 45, baggage man, Montreal, and R. Thivierge, an express employee. All other employees and passengers are accounted for.

Details of the flood conditions in the district where the wreck occurred and of the wreck are not available here. Telephone communication between Quebec and Drummondville has been impossible since late this afternoon.

A relief train was despatched to the scene of the wreck in charge of J. E. Morazin, local superintendent of the Canadian National Railways. Advances here were that but one person was injured, John Hetherington, of Chigny, Que., who was removed to the Drummondville hospital.

Two men were drowned and another had a narrow escape from death when the horse-drawn vehicle on which they were crossing a wooden bridge was swept into the Chaudiere River at St. Lambert by floods.

The victims were Trelle Roy, 19, and William Morin, 20.

The third man, George Couture, succeeded in swimming to the shore after the vehicle had been thrown into the raging waters.

Find Plane Wings At Sea

May Belong To One Of Lost Atlantic Flyers

Bogota, Colombia. — Despatches from Cartagena report that portions of two plane wings have been found on the coast of Coagira, near Tuen-taca.

The wings, measuring about nine feet in length, are slightly burned. The word "Heine" is perfectly legible in characters painted on the wings which are believed to be the wreckage of a plane lost in one of the various fruitless attempts to span the Atlantic in past years.

Want Fuel Guarantee

Toronto.—At the conference here between Premier G. H. Ferguson, of Ontario, Premier J. E. Brownlee, of Alberta, and Provincial Treasurer R. G. Reid, of Alberta, Mr. Ferguson stressed the advisability of the Alberta government "approving" all coal shipments to Ontario, and he promised, if this were done, that the Ontario government would lend every possible aid to an equitable distribution of the shipments when they reached here.

To Vote On Beer Parlors

Brandon. — Petitions containing over 1,700 names have been filed with the city clerk for a vote to be taken on the local option clause in the Manitoba liquor laws, and accordingly the council has decided that the vote will be taken on or about May 15. The vote must be taken within six weeks and on the result will depend the opening of beer parlors in this city.

Radio Broadcasting In Dominion May Be Taken Over By The State

Ottawa. — Government control of all radio broadcasting in Canada looms as a strong possibility of the future. They have such a system in Great Britain and it may come to it here before long.

While there has been no official decision as yet, it is known that such a proposition is being considered by those who have to do with radio.

A great deal of trouble is being experienced owing to the fact that many people — a fast increasing number — want to be into the broadcasting, whereas the channels of communication are very limited. Much conflict arises and complaints are very numerous as to reception being spoiled and other disagreeable conditions existing.

In consequence of this, it is learned that some interests securing new licenses have been cautiously advised

Recognition For Herman Trelle

Alberta Government Purchases Quarter Section Of Farm At Wembley Edmonton.—Payment of a first instalment in the purchase price of a quarter section of his farm at Wembley has been made to Herman Trelle, the Peace River wheat champion, through the department of public works. An appropriation of \$5,000 was passed in the estimates for this province.

Under the terms of the agreement, the quarter-section is being leased to Mr. Trelle for a term of five years with the option of purchase at the end of that time. The land adjoins the remainder of his holdings, on which his prize-winning wheat was grown, and is itself under cultivation.

It is understood that Mr. Trelle will continue his experimental work in which he has already achieved such distinguished success, and the action of the government, which was fully sanctioned by the legislature, is by way of demonstrating a province's grateful recognition of services rendered and good publicity provided through a double championship.

Trapper Found Dead In Northern Manitoba

Fool Play Not Suspected But Investigation Is Being Made

Nelson House, Man.—Word has been received here of the discovery of the body of John Lindbergh, 67 years old, in his cabin near Lake Trout, about six days journey from here. He left for the Northland last summer to establish a trapping line in the district.

Death is believed to have been due to natural causes.

The body was found by another trapper and his Indian companion who had decided on a visit to Lindbergh's cabin. They found several feet of snow piled against the entrance to the shack, with the door fastened from the inside.

Forcing their way in, the men found Lindbergh's body stretched on a bed. He was fully clothed. The cabin was in order and the body showed no signs of violence. A little wood was in the stove and there was plenty of food in store.

The last day scratched off the calendar was February 18.

Provincial police are investigating.

Growth Of Mergers In Old Land

Industrialists Of Europe Are Following Methods Popular In The States

London.—The great industrialists of Europe are making great strides in the trustification of many lines of manufacturing and trade, according to the Rt. Hon. David Lloyd George, former premier of Great Britain. Mr. Lloyd George points to the recent beam wireless and cable merger as indication of the advance of big combines on the European continent and declares that the example of the United States has made a great impression in the Old Land.

Dominions Must Decide

Signature Of Anti-War Pact Left To Countries Involved

Washington.—Whether the self-governing Dominions would sign separately any anti-war pact which is concluded is a matter to be decided between the British countries themselves, said Frank B. Kellogg, United States Secretary of State, to the Canadian press.

"The United States would, of course, welcome the signatures of any or all of the British Dominions," he continued.

The secretary of state had been asked if, in the event of Great Britain adhering to the proposed pact to outlaw war, Canada and the other British Dominions would be asked to sign separately.

Asked if he had had any conversation with the Canadian government on the subject during his recent visit to Ottawa, Secretary Kellogg replied that he had not.

The next step by the United States government has not been decided on, said.

To End Rubber Restriction Scheme

Premier Baldwin Makes Important Announcement In British House

London.—The Stevenson rubber restriction scheme, under which the proportion of rubber permitted export from British Malaya and Ceylon at a minimum rate of duty varied with the price of crude rubber, will come to an end on November 1, 1928.

Making an eagerly-awaited speech in the House of Commons, Premier Baldwin announced that all restrictions on the export of rubber would be removed on that date. Meanwhile the existing restriction scheme will be continued unaltered.

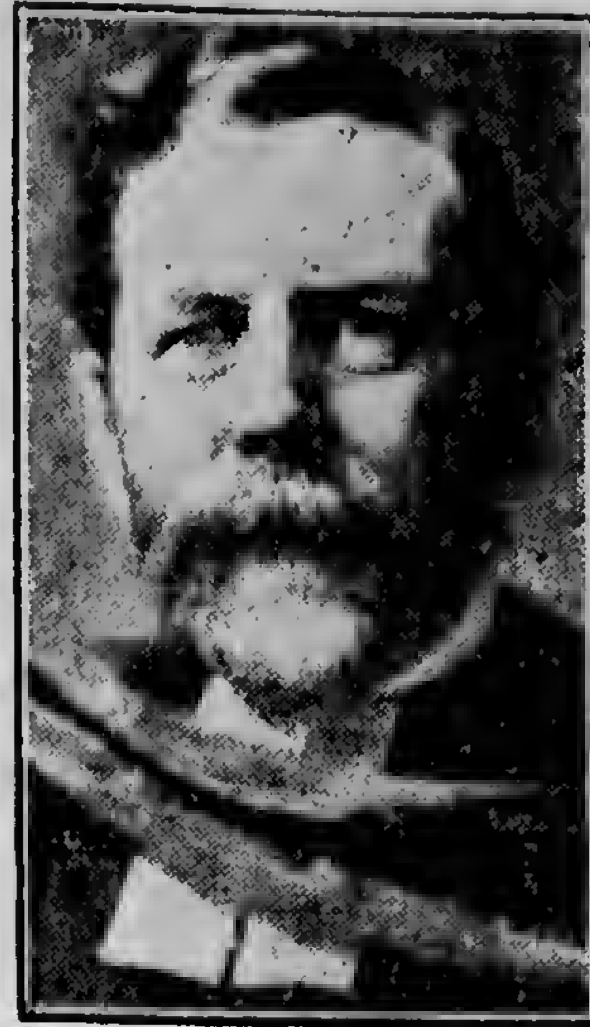

The Premier's announcement fell like a bombshell on the rubber exchange, which experienced the most excited afternoon in many years. Hundreds of dealers assembled to await the announcement, which would enable them to decide their future policy regarding sales and purchases.

Use Drastic Methods

Bandits Receive Short Shift From Mexican Troops

Puebla, Mexico.—Bandits captured in the state of Puebla are being hanged to trees beside the highways wherever found in this region by federal troops and home guards. The bodies are being left until devoured by vultures, the authorities hoping that the grisly sight will deter other holdup men. At one point not far from Puebla three bodies swing from a tree beside the road and at another point are two bodies, while in several other places there are from one to three.

VETERAN PASTOR PASSES

Dr. G. M. Milligan, veteran of the Presbyterian Church in Canada, and pastor emeritus of Old St. Andrew's Church, Toronto, and widely known throughout the Dominion, who died recently in his 88th year.

Completing Highway In B.C.

Federal Government Agrees To Operate In Construction Work

Revelstoke, B.C.—A start on the last link of the trans-Canada Highway between Revelstoke and Golden will be made early next month, according to Hon. W. H. Sutherland, Provincial Minister of Public Works.

According to the minister, the Dominion Government has agreed to co-operate in the construction of the highway around the Columbia River, and the work to be undertaken will commence at a point on the big bend North of here where work stopped at the beginning of winter.

Dr. Sutherland stated that the federal government cannot undertake the building of a road through Glacier National Park, but has offered to assist the province in building around the big bend. It is understood that Ottawa's contribution will approximate \$1,000,000. The work to be undertaken this year will be extensive, it was stated, and may entail an expenditure of \$225,000.

May Expand Air Mail Service

Canada Considering Link-Up With U.S. Trans-Continental Line

Ottawa.—An expansion of Canada's air mail service by linking up with the trans-continental services of the United States is under consideration by post office officials and a representative will shortly go to Washington to arrange matters.

At the moment there is no intention of establishing an exclusively Canadian trans-continental service, although experiments in this direction may be conducted this summer.

Second Naval Officer Is Found Guilty Over Royal Oak Affair

A Great Aid To the West

Building Of Railways To Outlying Parts Proves Big Factor

Toronto.—"One of the greatest things the Liberal Government ever did was the building of railroads to outlying parts of the country, such as the Hudson's Bay Railway and new lines into the northern part of Western Canada," said C. R. McIntosh, M.P. for North Battleford, and proprietor of the North Battleford News, at a luncheon given by the Toronto Men's Liberal Association.

Years ago, he continued, Canadians flocked across the border, as there were no railroads in the back country. Today lines were being constructed and the result was that the country was filling up with good families from all over the world. Speaking of immigration, Mr. McIntosh said his district was populated by people from all parts of the world. "These people," he said, "who have toiled and labored to make homes for themselves must be given a place in the governing of our country. Otherwise in the future we will encounter trouble."

Movies Sent By Wire

Ten Feet Of Film Used In Successful Experiment

Chicago.—An advance in the transmission of pictures by wire was made when for the first time a motion picture was sent over telephone lines to New York city for display there.

A close up of Vilma Banky, motion picture star, was taken in the telephone office of the American Telephone and Telegraph Company, and within half an hour the film had been developed and was being transmitted over the wires.

The film was cut up into short strips and sent as "stills" or ordinary pictures. At the other end of the line the strips were pieced together and then photographed on a regular motion picture film. Ten feet of film were used in the experiment.

Commander Daniel

Found Guilty

Sentenced To Dismissal From Ship With Severe Reprimand

Gibraltar.—The first court-martial growing out of the Royal Oak affair, which has stirred the British navy, ended with the conviction of Commander H. M. Daniel, on charges of conduct prejudicial to discipline.

The court, after deliberating one hour and ten minutes, found him guilty on all charges and sentenced him to dismissal from his ship and a severe reprimand. The sentence did not imply dismissal from the service and means that the commander will remain on half pay until it pleases the admiralty to appoint him to another ship or another post.

Three British Flyers Killed

Hong Kong.—Three British flyers were killed when the engine of their seaplane exploded as they were returning to the aircraft carrier Hermes. The victims were Flying Officers Hale and Graham, and the telegraph operator, Jackson.

Gibraltar.—A second British naval officer concerned in the controversy over jazz music and the ship's band on the British battleship Royal Oak at Malta has been found guilty and sentenced by court-martial and duly punished. Captain Kenneth G. B. Dewar, commander of the Royal Oak, received a similar sentence to that imposed on Commander Daniel in the court-martial which concluded on the "plane carrier" here. He was found guilty of acting in a manner prejudicial to discipline in accepting and forwarding a letter written by Commander Daniel criticizing Rear-Admiral Bernard St. G. Collard, in command of the first squadron of the Mediterranean fleet.

The second charge against Captain Dewar, of accepting and forwarding a letter, whose terms were contrary to the King's regulations, was announced as "not proven." The sentence was dismissal from his ship and a severe reprimand.

Captain Dewar conducted his own defence and made a fifty minute speech to the court. He attributed the whole trouble to "uncontrollable fits of temper on the part of Rear-Admiral Collard."

London.—The court-martial growing out of the controversy over jazz music on the British battleship Royal Oak has deeply stirred the population and it was evident that the affair would not be allowed to end with the promulgation of the sentences.

Two of the officers involved, Commander H. M. Daniel and Captain Kenneth G. B. Dewar, were sentenced to dismissal from their ship, and a severe reprimand. Rear-Admiral Bernard St. G. Collard, criticism of whose actions brought the charges of conduct prejudicial to discipline, was not court-martialed but was ordered by the commander of the Mediterranean fleet to strike his flag.

The admiralty promised to issue a statement on the case generally and this was awaited with eagerness, but was not expected immediately, as the findings of the court-martial must be reviewed first. The matter will be raised in the House of Commons when it reassembles on April 17, after the Easter vacation. In the meantime public opinion in general seemed to be on the side of the condemned officers.

Believes New Grain Will Resist Drought

Discovery Is Valuable To Australia Says Premier Bruce

Sydney, Australia.—The discovery of a type of wheat that resists drought has made it possible to open up large sections of Western Australia to advantage, Premier Bruce said in a speech here.

The Premier said, in this connection, a scheme for opening up Western Australia to agriculture on a considerable scale was being considered by the governments of Great Britain, the Commonwealth and Western Australia.

Will Show Edith Cavell Film

London.—The Exchange Telegraph said that the London County Council had decided to permit the showing of the film "Dawn," depicting the execution of Edith Cavell, British nurse, by the Germans.

Navigation of Straits To Port Churchill Is Planned For 1930 Season

Ottawa.—Navigation via the Hudson Straits to Port Churchill in the season of 1930 is the present objective of the Departments of Marine and Fisheries and Railways and Canals.

Plans are now being created for the setting up in the straits of two direction finding stations, similar to those operated by the Department of Marine on the Atlantic Coast, and in the Gulf of St. Lawrence.

The Canadian Government ship, Montcalm, will leave for the North about the middle of June, under the direction of Major N. B. MacLean, and the vessel will spend the summer in the straits. She will carry with her additional supplies and equipment to enable the three Royal Canadian Air Force bases to continue their work until the autumn.

During the summer, the work on the direction finding stations will be commenced and the men who will be in charge of this work will take over much of the equipment which the air force will leave when they conclude their work and start South. The Polar planes will be packed up and returned on the Montcalm.

It is understood that the air force will retain these planes which were purchased specially for operation in the straits.

The Department of Railways and Canals will probably send a special crew and equipment North to undertake the refloating of the ship, Canadian Raider, which was beached last summer after some difficulties were encountered.

Western Rivers Re-stocked

Upper.—The government hatchery at Banff, Alta. Lower.—A five male cutthroat after stripping. Note the protruding lower jaw, characteristic of male cutthroats.

A full report of the activities of last year by members of the Banff fish hatchery staff show that the staggering amount of one million, seven hundred and sixty-six thousand, eight hundred trout fry were placed in the streams of Alberta, under the direction of Superintendent J. Martin. A still further number in addition to the fry youngsters were eyed eggs totalling 73,010, which were also planted.

Spray Lakes and the surrounding streams received the eyed eggs and 205,800 of the total number of cutthroat. Of the remaining 748,000, some 120,000 were distributed between the Jumping Pound and its tributaries, Tough and Lees creeks,

near Cardston, Alta., and Big Hill and Cold creeks near Cochrane, Alberta. The balance were placed in park waters. Of the Rainbow species, tributaries of the McLeod River in Northern Alberta received 60,000; tributaries of the Highwood received 60,000, tributaries of the Elbow got 27,000, and, with the exception of 50,000 that were placed in the Old Man and Crow's Nest rivers, tributaries of the Bow got the remainder. The Bow River, running behind the Banff Springs Hotel, is popular for its fish. That it was a successful year for the Banff fish hatchery and that the benefit of this work will soon be felt by anglers, none can doubt.

Saskatoon Winter Fair Successful

Exhibits From Western Canada and Ontario Competed For Premier Honors

"The biggest and best fair yet held," aptly described the recent Saskatchewan winter fair held at Saskatoon March 20-23. Accommodation for the livestock classes proved entirely adequate to the needs of the extended lists of entries in the horse and cattle departments, and four additional barns in the city had to be requisitioned to house the surplus stock. Exhibits from the three Western provinces and Ontario, together with recent imports from Great Britain and Europe competed for premier honors in many of the events and the judges were faced by some very strong classes in both horses and cattle sections. R. Wright, Drinkwater, Sask., placed the awards in the cattle classes, Dr. Reid, of Canora, Sask., judged the Percherons, and Belgians, and Albert Ness, of Howick, Quebec, officiated in the Clydesdale section.

Dea Finlayson, of Brandon, Man., and C. M. Peter, of Kinross, Sask., were prominent winners in the stallion classes, the former with his imported Clydesdales, and the latter with Percherons and Belgians. Female classes were chiefly represented by entries from Lorimer of Conquest, Falconer, of Gowan, and Cruise, of Saskatoon, Leslie and Davidson, Watrous, Morris and Robertson, Zealandia, and Murray and Patterson from Young, were prominent winners in the Clydesdale commercial section.

The grand champion steer of the show was found in Victor Glenacree, owned by John Brown, of Brandon, Man. Earl Brown, also of Brandon, secured first place in the boys' and girls' calf class with Nigger Boy. Both these calves were of Angus breeding. A Shorthorn Angus steer which occasioned considerable interest was "Wee Willie," exhibited by the University of Saskatchewan. This steer while weighing almost 2,000 pounds at 2 years and 9 months of age, was still good enough to win the Saskatchewan bred beef class.

Concluding the fair with a successful sale of fat stock at which the top calf offered by Earl Brown brought 38 cents per pound, the management expressed their keen satisfaction at the splendid progress that has attended this annual show. To the energetic manager, Mr. Sid. W. Johns, and to the President, Mr. A. Wilson, the increasing support of exhibitors generally, is particularly gratifying. New accommodation will have to be secured before another year as the present show building—an old Canadian National roundhouse—is to be sold and removed from the premises. A permanent arena is the objective of the management and judging by the magnitude and the success of the fair just held, nothing short of this will adequately serve the need of Northern Saskatchewan's annual winter fair.

Sheep For Manitoba

Plan To Place 100,000 Sheep Annually On Manitoba Farms

A movement is under way for the placing of 100,000 sheep annually on Manitoba farms. These will be sold in groups of fifty to each farmer, somewhat similar to the plan now in operation in North Dakota. At a conference of members of the Sheep Breeder's Association financial representatives and members of the Winnipeg and Brandon boards of trade, J. D. McGregor was appointed temporary chairman of a committee to make further arrangements for the carrying out of the plan.

Mrs. Bloop: "Don't take it so hard. In a month he'll be back again." Mrs. Zoop: "That's just it. I thought the judge would make it six months."

Aristocrats and dentists are judged by the excellence of their extraction.

"Speaking to my wife I used a word which so offended her that she has not spoken to me since." "I should be obliged if you would tell me what the word was."—Pele Mele, Paris.

W. N. N. 1728

Used Wrong Metaphor

Lloyd George Credited With Making Ship That Turned the Tables

And, speaking of the uses of words, Mr. Lloyd George's undoubted fluency has just been turned against him in an ingenious manner. There was a by-election in the north the other day. "L.L.G." intervened in the campaign, and the Liberal candidate won. The Liberal leader forthwith declared that the Tory party was "like a polar bear drifting south on an iceberg." And, pleased with his nautical metaphor he went on to declare that the defeated Conservative candidate had been "shaughed."

Whereupon the defeated Conservative produced a dictionary in support of his contention that he who is shaughed is "the victim of a very mean outrage."—London Correspondent, New York Herald.

Name Hotel After Famous Wheat

Hotel Marquis To Be Erected In Lethbridge As a Community Enterprise

The new hotel which is being built in Lethbridge as a community enterprise, is to be known as the Hotel Marquis, to commemorate the famous spring wheat of that name. Marquis wheat was originated at the Canadian Government Central Experimental Farm, Ottawa, several years ago. Its introduction is regarded as the most important event in Canadian agriculture. About 90 per cent. of the spring wheat grown in Canada and 60 per cent. grown in the United States is of the Marquis variety. Marquis wheat has won more world championships at the International Grain and Hay Show at Chicago than any other variety.

Canadian Tree Species

In Canada there are approximately 150 different species and varieties of plants reaching tree size. Only 31 of these are coniferous, but the wood of these forms 95 per cent. of our forest products, and the trees themselves cover even a larger proportion of our potential forest area.

"Is this the road to Beaverville?" enquired the tourist. "Yess," drawled the farmer, "Tis if you're intendin' to circle the globe. But if you turn around it's 24,998 miles nearer."

Madagascar's surplus crocodiles are to be skinned for bookbinding and shoe leather. Their fat is to be used in the treatment of rheumatism and other diseases.

Red Fife Wheat

Was the Standard Spring Wheat Variety In Western Canada For Years

The first notable variety of wheat to be introduced into Western Canada was one which had been developed more or less fortuitously, by a farmer named David Fife, of Peterborough County, Ontario, after whom the wheat came to be named. This variety, fortunately for Canada, proved to be a wheat of very high milling and baking quality as well as a good yielder. From the year of its introduction into Western Canada (about 1882) until the appearance of the world-famous Marquis, some twenty-six years later, Red Fife was the leading, and, in fact, the standard spring wheat variety of Western as well as Eastern Canada. It was this variety which came to be taken as the basis upon which Canadian official and commercial grades of wheat were established. Thus the original grades required that, in each case, there must be a certain minimum per cent. of Red Fife present. It is of further interest to note that practically all the leading spring wheat varieties in Canada today are more or less closely related to Red Fife.

While the introduction of the Red Fife variety into Western Canada constituted an epoch-making event, yet this variety possessed certain serious defects. The defects of Red Fife, especially its tardiness in maturing, were quickly recognized by Dr. William Saunders, who became the first Director of the Canadian Government Experimental Farm System. He realized that if those great virgin plains of the Canadian West, just then opening up to extensive exploitation, were ever to attain a position of prominence as a wheat producing country, an earlier maturing variety than Red Fife must be employed.

What Interested Him

Hubby didn't show much interest in the newly arrived baby, and the young wife was disturbed. She was overjoyed one night to discover him standing over the baby's cot. "A pony for your thoughts," she said, tenderly. Startled, he blurted out: "For the life of me I can't see how anybody can make a cot like that for \$1.50."

Col. Lindbergh is said to long for a double to do his talking for him. This is the first hint that the famous young man is contemplating matrimony.

Television In the Home

Should Be Possible Within a Year In Prediction

The New York Times quotes an unnamed representative of the Radio Corporation of America as predicting that one year ought to see television in the home.

The invention of television, the newspaper says, causes observers in the radio to give credence to the rumors of the acquisition of the Victor Talking Machine Company by the Radio Corporation. The observers and radio engineers say that television and picture radio require a motor to revolve a disc or cylinder synchronized with similar apparatus at the transmitting end and that it is logical that the phonograph and radio should be one complete instrument.

Methodical As To Tips

New York Waiters Know What To Expect From Regular Customers

New Yorkers become accustomed to leaving the same amount of money as tips when they dine in hotel restaurants. For luncheon some leave a quarter, and for dinner they will leave a half-dollar. Waiters know just what to expect when they see various parties enter the dining rooms and take their favorite tables.

The other day a regular patron of Bretton Hall tearoom furnished through his change trying to find enough change to make up 25 cents. The best he could dig up was two dimes, three pennies and a 2-cent stamp. And that's what the waiter found when he cleared away the dishes.

What Causes a Cold

After eleven years' study, Dr. Volney S. Cheney, medical director of a large Chicago packing firm, declares that colds are not infectious at all, but are caused by overeating, lack of exercise, loss of sleep and mental strain.

Lead Mining In Yukon

In 1926 the Yukon produced about 2,930 tons of lead or about 2 per cent. of the total Canadian production. Shipments take the form of silver-lead ores and concentrates from the Mayo District.

George: "Yes, he was bitten by his own dawg."

William: "Was 'e now? How was that?"

George: "He forgot himself and spoke to the dawg like what he do to his wife."

45 WEIGHT LESS AFTER SLEEP?

Experiment Made By Lawyer Is Not Conclusive Proof

A certain observer says man loses weight while he sleeps. The proposition that the body loses weight during sleep is not in accordance with the views of stock men. Farmers, when fattening hogs, try to have them sleep about two-thirds of the time. Chicken fatteners keep their fowls in darkened rooms. They plan to have them sleep all the time except for short feeding periods. Experience seems to teach that animals tend to put on weight while sleeping. Then let us see what is the evidence to the contrary.

A lawyer with considerable training as an engineer kept a very careful detailed record of himself for several years, or rather, during the course of several years he kept such records for several periods of several months each. He was equipped with accurate scales. He weighed himself many times a day and entered his weights in the record. He made detailed records of everything he did and everything of importance in his environment. All of this record was plotted on charts. One weighing was just before going to sleep and another was upon waking. Without exception he weighed less after sleeping than he did when he went to bed. Does this prove that sleeping causes loss of weight?

While sleeping nothing went into his body except comparatively dry air. Nothing left his body except expired air and sweat. Some body substance was used up in maintaining body temperature and in carrying on respiration, heart action and other vital processes.

Had this man weighed and analyzed the air he expired, and especially had he determined how much moisture it contained, and had he collected and weighed the perspiration he excreted he would have accounted for all his loss of weight during the sleeping period. In all probability he slept in air that was far too dry. His body, through breath and sweat, had the job of moistening the air of his room. Carrying out that job was responsible for the loss of weight.

Starting a Strawberry Plantation

Strawberries Will Thrive On a Great Variety Of Soils

Strawberry plants will not stand being covered with water in early spring or during the late winter, therefore good surface drainage is absolutely necessary. A gentle slope is the best place on which to plant. The strawberry will thrive on a great variety of soils, from a very light sand to heavy clay, but, according to a Dominion Department of Agriculture bulletin on the "Cultivation Of the Strawberry," it is best to select a moderately light friable soil. A soil that does not pack or bake is to be preferred as it is important to get the young runner-plants rooted as early as possible. Land under cultivation should be used for a new strawberry plantation, as land which has been in sod for some time is liable to be infested with white grub. Land infested with couch grass or other persistent weeds should be avoided. A thorough ploughing, disking, harrowing and rolling is necessary before planting. The bulletin, which covers the whole subject of strawberry growing, may be obtained from the Publication Branch, Department of Agriculture, Ottawa.

Good Memory Test

We were struck the other day by reading that the President of the Firemen's Federation of France was at a dinner in Paris the other day and offered to give a second dinner to the whole company if even three of the guests could tell him the position of the fire alarm nearest his own home. It was found that not one of them could. How does that apply to our readers? Do they know where the nearest fire alarm is? Also do they know the number to phone to in case of a fire? Try it first on yourself and then on your friends.

Her Instructions

A young woman who seemed to be having her first experience in a bank approached the window of a paying teller and gave him a large check which she wanted to cash.

"How do you wish the money?" the teller inquired.

"Oh," replied the young woman, in some confusion, "I'll just hold out my hand and you can put the money in it."

The milkworm and the honeybee are the only domesticated insects in the world.

Honor Heroic "Mounties"

Names Being Given To Stations On Hudson's Bay Railway

A prophet may be without honor in his own country, but it is different with the hero.

The foundations of Canada's North and West were laid with heroism and Canada does not forget her pioneers. The mounted policeman has always been a figure of romance in Canadian history, and it was a typically Canadian gesture that, when it came to the naming of stations along the Hudson's Bay Railway, two "mounties" who 30 years ago died heroically, should be remembered.

The point which has hitherto been known as mile 178.96 will be known in future as Hoskin, and, further along the line is a place called Wilde.

Corporal C. H. Hoskin was killed in 1897 by the Indian, Almighty Voice, and Sergeant W. B. Wilde was killed by another Indian, Charewal, the year previous. Both men died at their duty, trying to maintain the law, and in honoring them Canada honors itself.

In the revision of station names along the Hudson's Bay Railway, a number of other men whose lives have not been so spectacular but who have worked in their way for the opening of the new country are commemorated. Rawebb is named after Ralph Webb, former mayor of Winnipeg, and there is a point bearing the name of General Paterson president of the On-to-the-Bay Association, both of whom have been unrelenting in their efforts to bring the North to its own. Jacam stands for J. A. Campbell, former M.P. for The Pas, and Bird is named after the present member for Nelson.

The recent visit of Right Hon. L. C. M. S. Amery, secretary of state for the Dominions, is commemorated at Mile 356, which becomes Amery.

Theatre For Passion Play

New Building In Bavaria Will Be Ready For Next Performance

A theatre built of stone and with a seating capacity of 4,500 will soon displace the present wooden structure at Oberammergau, Bavaria, where the Passion Play is held every decade. Whether the next series of performances will be held in 1930 or 1932 is not definitely settled, but the new structure will be opened whenever they are held.

A new building for dressing rooms for the 700 players in the drama will also be erected.

The total cost is estimated at \$72,000. A loan will be necessary to get funds for the construction of the two buildings.

Whether the tradition of having the stage in the open will be abandoned in the new plans has not been decided.

Agricultural Canada

Agriculture Holds Leading Place In Trade Of The Dominion

The importance of Canada as an agricultural country is emphasized in the trade report for 1927, in which agricultural, vegetable and animal products are credited with \$711,548,459. Next comes wood and paper valued at \$280,704,981. Among the principal items of imports agricultural, vegetable and animal products total \$297,515,594 in value, with iron and its products in second place, valued at \$249,145,395. Canada's principal foreign trade is done with 20 countries.

Took Three Of Them

At the ship's concert on an ocean liner a collection was taken up for the Seaman's Fund. It totalled \$460.03, and the chairman, amused at the three odd cents, suggested that perhaps there was a Scotchman on board. "Hoot mon," piped up a voice from the Highlands, "there are three of us!"

A woman may pretend to be convinced against her will, but she never is.

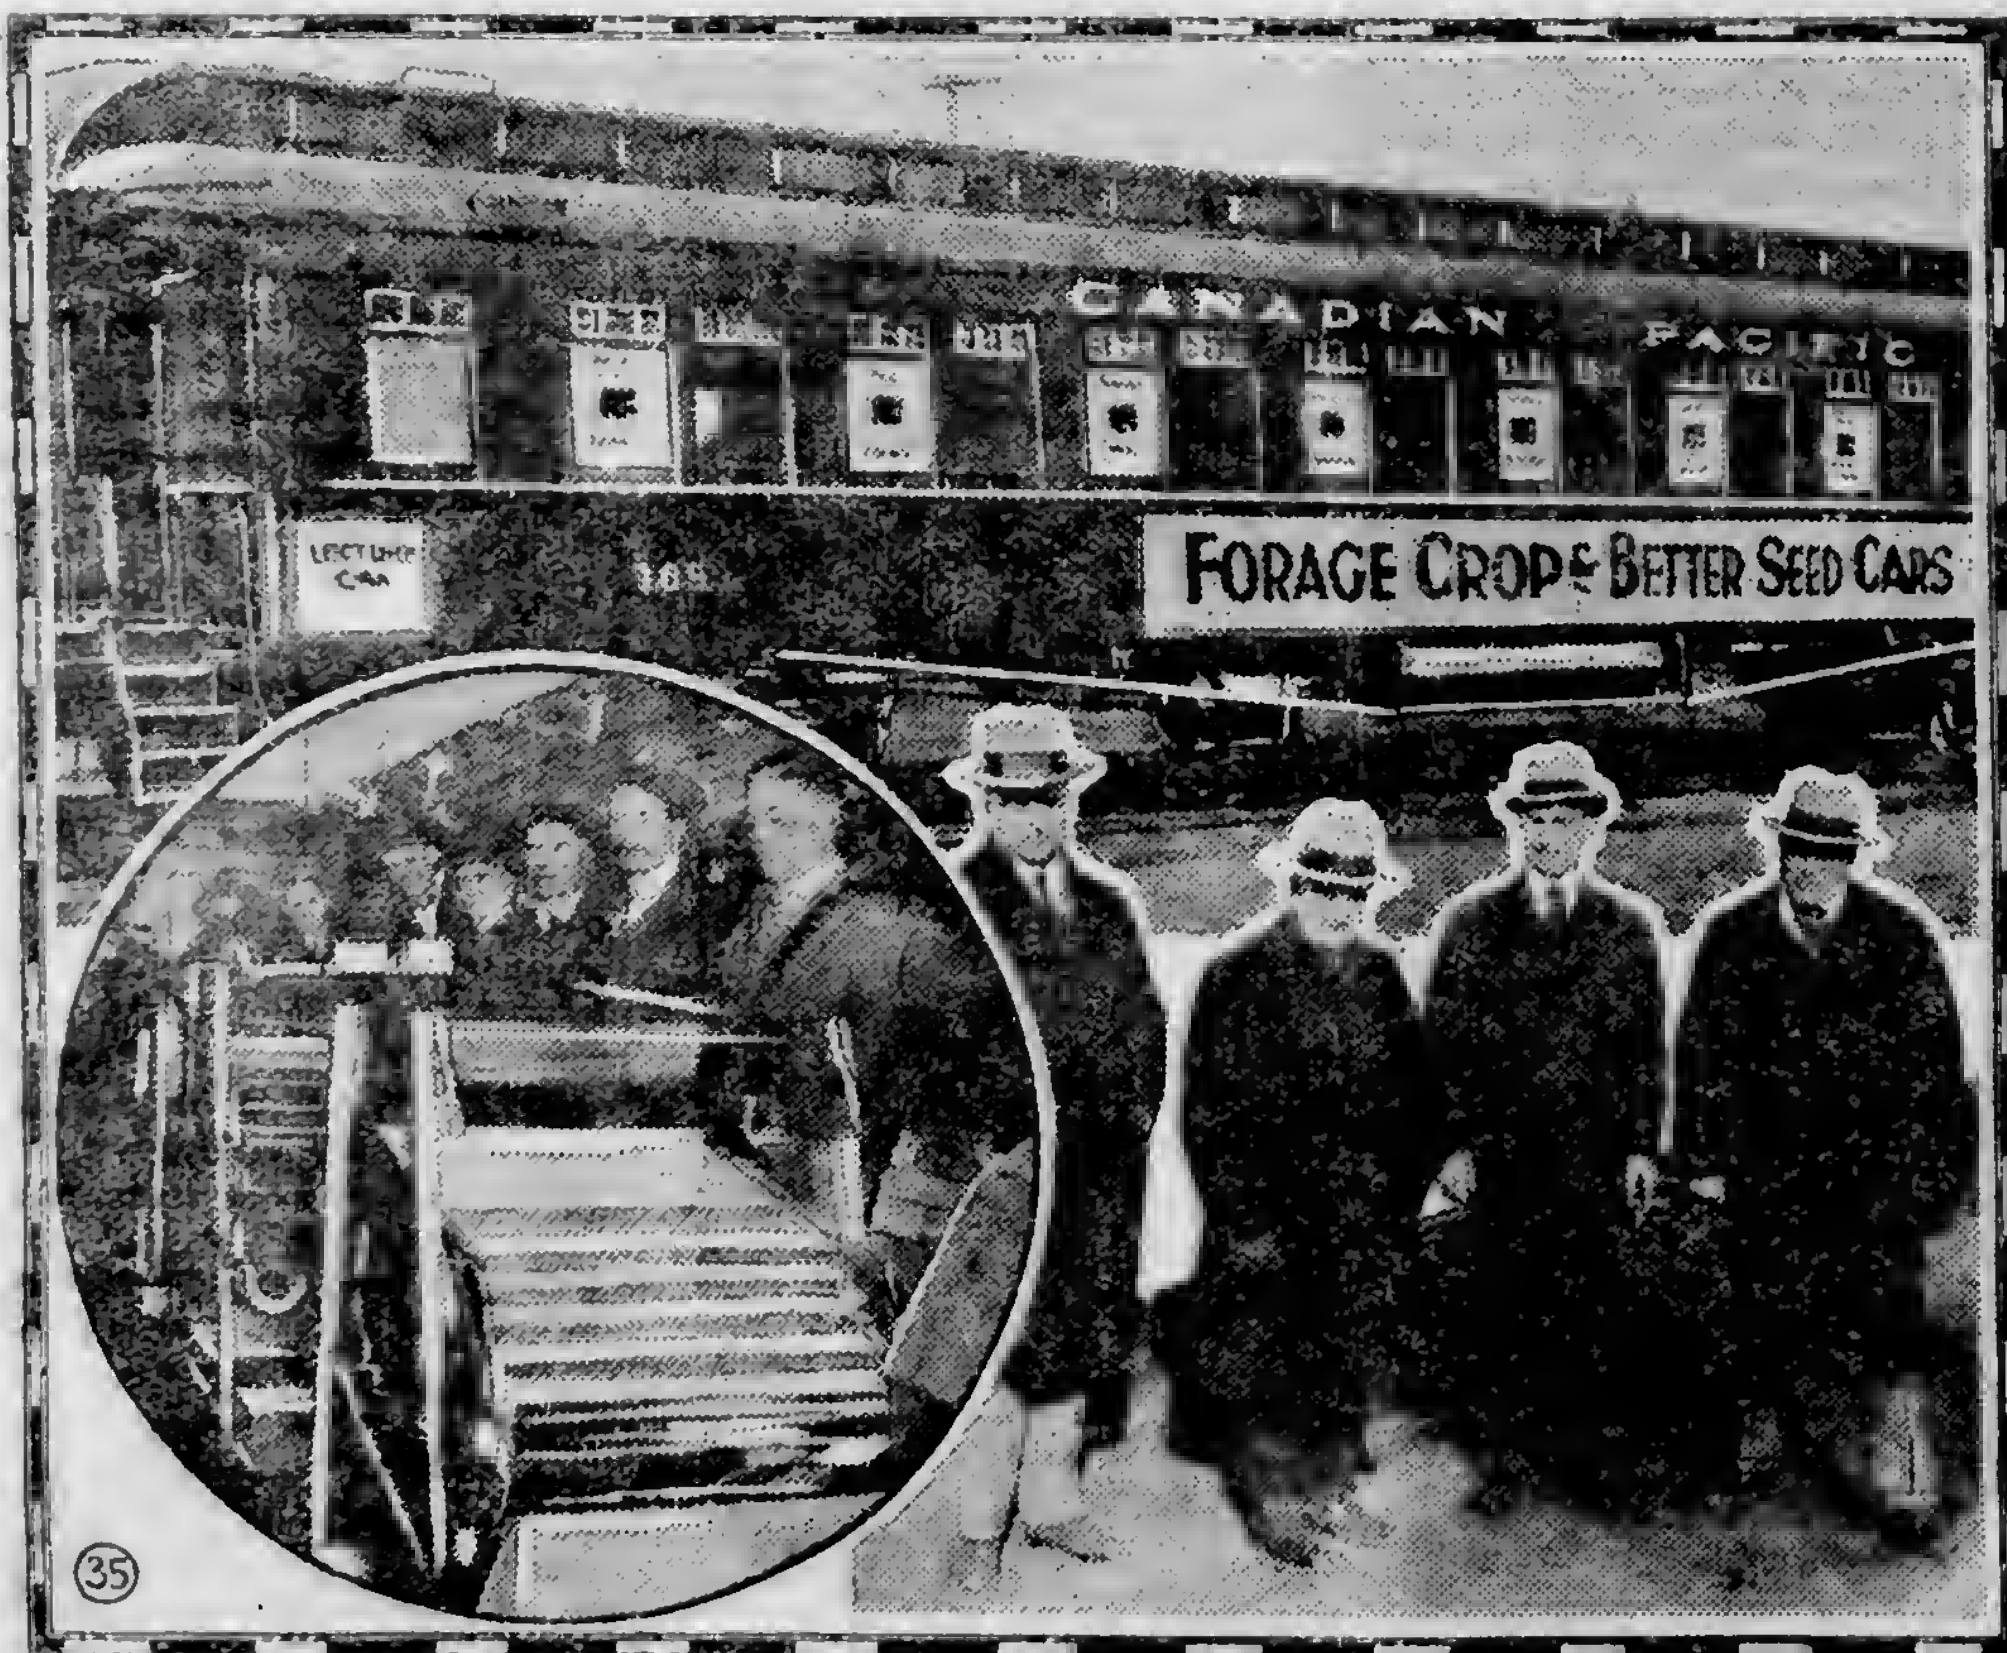

There'll be no one in heaven better than the average man imagines he is.

"An infanticide and a fratricide have been acquitted. Who ought to be condemned, then?"

"The jury."—Il Travaso, Rome.

C.P.R. Seed Train Tours West

Upper—Specially-fitted lecture car used by the Canadian Pacific on the Forage Crop and Better Seed Grain Train. Windows of the coach are equipped with colored transparent photographs depicting various phases of farming activities. Lower right—The Hon. C. M. Hamilton, Minister of Agriculture, second from the left in the photograph, who opened the Better Seed Grain Train, photographed with F. Hedley Auld, Deputy Minister of Agriculture (left); R. T. Eldridge, manager Regina Industrial Exhibition Association, second from the right; and George Williams, representative of the Canadian Pacific Agricultural Department. Lower left—Interior view of one of the cars containing seed cleaning machinery.

With a view to further promoting the best use of seeds and obtaining first-class results in addition to educating the farmers as to how to overcome seed grain and forage crop difficulties, the Canadian Pacific Railway has again placed a touring demonstration train on their lines, which visits all important farming centres in the West, Prairie Provinces and part of the East.

This train went into service at the latter end of last month, the opening being attended by a representative gathering of government officials and members of the Saskatchewan Wheat Producers. The value of such a train was stressed by the Hon. C. M. Ham-

ilton, Saskatchewan Minister of Agriculture, who urged the farmers to make the best possible use of this splendid advantage offered by the railway. In addition to the lecture car, the train consists of two baggage cars carrying a number of seed cleaning machines and others to be used in demonstrating seed and smut treatment. Dairying will also be featured throughout the tour, lectures in this connection being given by R. B. Vogne, government dairy promoter.

In the towns already visited, the train has been greeted with enthusiasm with the farmers displaying an eagerness which speaks highly of the reputation of the seed and forage crop demonstration train. It is oper-

ated in conjunction with the University and extension service of the Saskatchewan provincial government, with all cars having been equipped at the Weston Shops of the Canadian Pacific Railway at Winnipeg. Several of the cars are provided with motor-driven grain cleaning machinery of various types, while other cars are fitted with motion picture accessories for the showing of various phases of grain activities, with still others for the purpose of exhibiting grain and grasses.

The entire train is opened for inspection at the various stops, demonstrators being on board to explain the entire exhibit and to give advice on important points in seed selection.

LESSON No. 16

Question: Why do growing children, particularly girls, need emulsified cod-liver oil?

Answer: Growing children, and particularly girls, need vitamin-rich nourishment to help them through critical stages of extreme tax on their strength.

Pleasantly flavored, easy to take, children like

SCOTT'S EMULSION

PAINTED FIRES

Copyright, Canada, 1925

CHAPTER XXI.—Continued

Thus appealed to, Danny Corbett went over to the couch and carefully inspected the young thing that was likely to make inroads in his hard earned income. He put his clumped and dirty little hand very lightly on the glassy, smooth head, and felt its tiny beat. He gently touched the velvet cheek and found it soft as a rose-leaf to his fingers. He put his hand in his pocket and drew out thirty cents in change and looked hard at it. He may have been thinking of cold winds and aching legs—he knew something of them. But his answer was, "Sure Mike! I'll do it. Are you pretty sure her mother will die, Ma?" Danny's tone was eager.

"We ain't wishin' her mother no harm, Ma," Rosie quickly interposed, seeing the rebuke that was coming to her business partner. "We ain't wishin' nobody no harm." Rosie was very anxious not to prejudice the case. "But we know there is always a danger—you know yourself, Ma, that none of us knows one day from another, we're here today and away tomorrow, as I have often heard you say and Danny and me are just tidlin' it over in case somethin' should happen—that's all."

The warm heart of Maggie Corbett was tender to her offspring at that moment. "Look at that, John, would you? Good little things, after all, and yet it was only this mornin' they were fightin' like drunken shantymen. I often thought if they had had a baby in the house it might have softened them. Well, don't be settlin' your hearts on this wee one, for her mother is not goin' to die, I don't think; though you never can tell about a woman when her man has gone back on her."

Outside the snow was still falling. The evergreen trees were bending with the weight of it, their branches hanging down like great white bears' paws. Christmas Eve surged forward with all its infectious gladness as the crowds of belated shoppers increased. The electric fans in the win-

YOUNG WOMEN SUFFER MOST

These Two Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Ayer's Cliff, Quebec.—"I have been teaching for three years, and at the end of the year I always feel tired and have no appetite. I was awful sick each month, too, having pains in my back until sometimes I was obliged to stop working. A friend recommended Lydia E. Now I take six bottles every year and recommend it to others."—DONALDA PANTUX, Ayer's Cliff, Quebec.

"Unable to Work"
Canning, Nova Scotia.—"I had irregular periods and great suffering at those times, the pains causing vomiting and fainting. I was teaching school and often for some hours I would be unable to attend to my work. Through an advertisement in the papers I knew of Lydia E. Pinkham's Vegetable Compound, and it has been of great benefit to me, the troubles being completely relieved."—LAURA J. EATON, Canning, King's County, Nova Scotia.

W. N. N. 1728

dows were hard pressed to keep back the shooting frost ferns, which threatened to hide the season's offerings. Handsome cutters, with beautiful robes thrown over the backs of the seats, stopped at the curb to let out hurrying shoppers; delivery boys on foot, on wheels, in wagons, loaded with parcels, hurried to the suburbs of the city, sometimes pausing to look in at uncurtained windows where happy families gathered around sparkling tables—families so happy over the arrival of guests that they forgot to draw the blinds and so allowed some of their happiness to overflow into the street. Rosy shaded kumps threw patches of radiance on the glistening snow, Christmas wreaths tied with satin streamers glowed deeply red against the windows. The pulse of the city was beating with laughter and sleighbells.

At the corner of Second Street and Jasper Avenue a congested street car stopped to let out a flock of little girls and boys on their way to the Christmas tree in the First Baptist Church. Certain of the little girls, with their curls protected from the falling snow by being tucked safely away under their toques, were carrying mysterious pasteboard boxes containing sashes and bows and wings for the fairies. Others of them were daintily hooded and masked, their identity and sex entirely unguessed, for were they not cast for the dreadful witches of Shadowland? Accompanying them was a liberal sprinkling of parents, mostly mothers, with a few self-conscious fathers who had the appearance of having been dragged out. The mothers had an air of very conscious unconcern, as if they did not know their little boys or girls were going to take a part that was bound to be the very best thing of the program.

The Salvation Army Citadel blazed with light and pulsed with activity, for the big supper, where all were welcome, was going on, and the odors of turkey and sage and onions, drifting out into the street, compelled the reluctant ones to go in.

At midnight, when the bells were ringing, the snow suddenly stopped in that abrupt Alberta way. The city's lights were so many and so bright against the deep India blue of the sky, it was hard to tell them from the stars, but high overhead was to be seen the North Star, beloved of all bewildered travellers. Now it twinkled and gleamed above all these scenes of good fellowship and merry-making with unmistakable approval. Into the uncurtained window of the Corbett's big room it peered with a deeper interest and kinder understanding, for it could see that the Winnipeg couch was drawn out from the wall to make it into a full-sized bed, and in it there slept the unperturbed young Lil with Rose Corbett on one side of her and Daniel Corbett on the other—her two new friends, who had covenanted in her presence and in the presence of each other to furnish her with shelter, care and sustenance in the event of her mother's death. Rose and Daniel Corbett—the underwriters!

CHAPTER XXII.

It was Christmas afternoon when Helmi awakened—Christmas afternoon, the very sound of which brings pictures of children playing with trains on living-room floors, satisfied with turkey and candy, starchy-eyed with presents, numb with surprises and joy. Christmas afternoon! Of all the spicy, perfumed, sparkling, glorious afternoons of the year the most dazzling and glorious; not merely an afternoon or a day that can be marked on a calendar or divided into hours like other afternoons—not that at all Christmas afternoon is an atmosphere, a perfume, a sensation, a feeling, a spiritual experience.

It was Christmas afternoon when Helmi awakened. Number 18 in the North Star Rooming House did not suggest festivity, with its bare, buff walls, dull gray paint, elm dresser, iron bed, bare floor, with one strip of Japanese matting worn in the middle down to the threads. But Helmi was not left entirely without some gleam of Christmas, for Rose and Danny who were going to the Salvation Army Cantata that night, went singing down the hall:

"Away in a manger, no crib for a bed,
The little Lord Jesus laid down
His sweet head."

and it brought to Helmi's mind the Christmas story; and because her own heart was more tender than it had ever been, owing to the rise and fall of the little white veil which covered Lil's face, she loved the little Christ Child more than ever, and thought of Him and His pale mother as they lay there in the manger with the noise of cattle all around them.

"The stars in the sky looked down where He lay,
The little Lord Jesus, asleep on the hay."

Rosie, just outside the door, was

The tender leaves of the tea plant are extremely sensitive to climatic changes. That's why Red Rose Tea is packed only in aluminum—so it will never lose strength or flavor through contact with dampness. Every package guaranteed to be in perfect condition. G.W.

Ocean Fare £2

Under the British Nomination Scheme, your relatives and friends can travel at this low rate from Britain to Canada

also reduced rail fare—children under 17 free. For complete information, please, write or call personally at White Star Offices in Montreal, Toronto, Winnipeg, Calgary, Edmonton, Saskatoon, Vancouver. 237

WHITE STAR LINE CANADIAN SERVICE

singing as she 'did' the lullaby in the hall with distressing moan; Danny was working further down the hall. Helmi was awakened from her dream by the entrance of a little man with a slender black bag in his hand. He came in without knocking, and stood at the bottom of the bed regarding her critically. Before he could frame a question Mrs. Corbett had arrived, having seen the Doctor's car at the front door.

Mrs. Russell, who lived in No. 16 and did the cleaning in the City Hall, and therefore knew something of the correct forms of procedure, had notified the Department of the happening in No. 18. Dr. Synnott came over at once. No one likes to be disturbed on Christmas afternoon, when the delicious sizzle of a turkey pulsates in the atmosphere of the house and one has just helped to put two leaves in the dining-room table. Dr. Synnott was prepared to be quite stern. Indeed, as a representative of the city authorities how could he help being stern with these unregulated young women who leave their babies on the steps of the City Hall, so to speak. It was becoming entirely too common, and the Property Owners' Association at their last meeting were complaining about it; properly so, too, for they were the people who had to pay the bills. Everyone when in need rushed to the City—widows looking for help—unemployed—homeless—unfortunate girls—all come to the City.

(To Be Continued.)

Little Helps For This Week

"Be thou faithful unto death, and I will give thee a crown of life."—Rev. ii. 10.

Why should our spirits be oppressed
When days of darkness fall?
Our Father knoweth what is best,
And He hath made them all.
He made them, and to all their length
Sets parallels of gain;
We gather from our pain the strength
To rise above our pain.

—Alice Cary.
God, who in mercy and wisdom governs the world, would never have suffered so many sadnesses, and have sent them especially to the most virtuous and wisest men, but that He intends they should be the seminary of comfort, the nursery of virtue, the exercise of wisdom, the trial of patience, the venturing for a crown, and the crown of glory.—Jeremy Taylor.

Taking No Chances

Nurse—"When are you operating on today?"

Orderly—"A fellow who had a golf ball knocked down his throat at the links."

Nurse—"And who is the man waiting so nervously in the hall—a relative?"

Orderly—"No, that's the golfer—Soots gentleman. He's waiting for his ball."

"Is that all the work you can do in an hour?" asked Sam's new employer. "Well, boss," said Sam, "I dussay I could do mo'—but I neva'll was one for showin' off."

Salesman For Face Cream Learns a Good Lesson

Mr. Vandivier, New York, writes: "I was a salesman of creams for healing pimples, blemishes, etc., but when my face broke out with blotches, pimples and blackheads, I tried one sale after another with no results. Finally I decided I would have to get at the cause—constipation. I was amazed to find that within a few days after taking your vegetable laxative pills for constipation my skin took on a new healthy look." CARTER'S LITTLE LIVER PILLS [All druggists—25c and 75c red pkg.]

Have Renamed Destroyer

Implied Compliment To Canada Seen In Action Of Admiralty

An implied compliment to Canada is seen by officials of the Department of National Defense, Ottawa, in the action of the British Admiralty in perpetuating memories dear to the Dominion in the renaming of a destroyer of the Royal Navy.

When Canada decided to rename the destroyers Torbay and Tormentor, the two vessels taken over by the Royal Canadian Navy, to Vancouver and Champlain, it was found that another destroyer of the British fleet already bore the name Vancouver. However, the Admiralty at once offered to rename the ship of the home fleet, to avoid any confusion, and to allow Canada to use this distinctive title.

Advices received at Ottawa headquarters are to the effect that, effective April 1, the former British destroyer Vancouver will be the Vimy.

A Stylish Blouse

It's color these days, that makes a garment stylish! With a fifteen-cent envelope of Diamond Dyes, you can make an old or faded waist as smart as any on display. Keep all your clothes stylish—through the quick magic of home dyeing.

Beautiful dyeing or perfectly gorgeous tints, is easy, if you'll only use original Diamond Dyes (true dyes). Tinted the house, too: curtains, spreads, etc., are Diamond Dye'd in an hour or less; right over other colors.

FREE: Your Druggist gives you the Diamond Dye Cyclopedic, valuable suggestions, easy directions, actual piece-goods color samples. Or write for illustrated book Color Craft, post-paid from DIAMOND DYES, Dept. N16, Windsor, Ontario.

Diamond Dyes

Just Dip to TINT, or Boil to DYE

THE NEW GERMAN

Enthusiasm For Military Training Gives Place To Interest In Outdoor Sports

Not the least significant of the characteristics of the new Germany, as contrasted with the old, is its growing interest in outdoor sports.

The youth of Imperial Germany were conspicuous for their enthusiasm for military training. The youth of republican Germany, particularly those in school, are worrying their parents because they seem as much or more interested in sports and games as they are in their lessons.

This turn of interest is not confined to the extremely young. A great many Germans are philosophizing on whether it is a healthy sign in the national life that 50,000 people should go to a football match, as it is now quite common for them to do.

The alleged extravagance of German municipalities have been partly directed toward developing public playgrounds, and swimming pools, and baths. Self-respecting German communities are getting the idea that one of the obligations of modern municipal authorities is to provide healthy opportunities for recreation for their citizens. There is a tendency to devote large tracts, 100 acres or more, sometimes on a scale which would do credit to Imperial Rome, to a series of athletic fields, racetracks for runners, and motor bicycles, a succession of pools and swimming baths—occasionally nearly a hundred yards long—tennis courts, a sylvan open-air theatre and a large gymnasium, plus a restaurant where all kinds of refreshments are served.

Wedding Bills In Japan

Marriage in first-class style in any of the larger Shinto shrines in Tokyo, Japan, costs the equivalent of \$25 gold. The ceremony includes the attendance of high priests, a clerical orchestra with flutes, cymbals and pipes, and all possible trimmings. Second-class weddings cost \$25 and so on down to weddings classed as "plum," "bamboo" and "plum," the plum style necessitating a shrine too of \$7.50.

Jones (as he trends on tack)—"I wish you wouldn't be so careless in throwing tacks about, Mary."

Mrs. Jones (placidly)—"Henry, you are getting madder every day. I can buy a whole package of tacks for a nickel."

THE BABY TEETH

How many should there be? "Ten little fingers and ten little toes"—making twenty in all—and there you have their number. Easy to remember isn't it?

And when should you begin to look for them? About the sixth or seventh month.

And which comes first? As a rule, the lower front teeth, the central incisors.

So after all baby's fretfulness he has a brand new tooth or two, so white and so sound they look, that you never give a thought to future tooth troubles.

Then the other eighteen or nineteen white coated little "millers" will follow at somewhat regular intervals until Sonny is two years old, when he should have his full temporary set.

These are the temporary or deciduous teeth, being known also as the "milk teeth," from which you will be aware, of course, that they won't be retained right through adult age. They should all remain in place, however, until about the seventh year, when, through the natural process of shedding, they commence to be lost.

Then as the time approaches for the eruption of the second set, unless the first teeth are sufficiently separated in front to allow one or two thicknesses of blotting paper between them, the arches have not properly expanded and the second set is certain to be crowded and irregular. In such a case, the family dentist should always be consulted.

Since Sonny is going to lose these small teeth in good time and get a nice new set, why bother to care for them?

Well, little Sonny does not want a tooth-ache any more than do you, and for several other good reasons of which more to follow.

Too Much Food

People These Days Eat More Than They Need

The problem interesting more people than any other in this country today is girth control. There is no topic of conversation more general and more personally important to multitudes of people than how to keep from getting too fat. This is a strange phenomenon in a world that, from the dawn of history, has been hard put to it to get enough to eat. It is probable that there never has been a time when more than half of the world's population was not more or less continuously hungry, but in the United States food is so abundant that everybody must be warned not to eat too much, and there is a protest against reprimanding land lest its cultivation should increase in already embarrassing surplus of foodstuffs.

Canada needs a larger population, but to bring in people for whom proper provision has not been made beforehand will only complicate the situation. Those who are for settlers at any price do not think on the results of their policy.

That man doesn't live who has not thought he had all the elements of greatness in him.

Extending Air Mail Service

If Satisfactory Winnipeg May Be Served In Near Future

Plans are being completed by the post office department for an extension of the air mail service connecting large centres like Montreal and Toronto with the first land stop of trans-Atlantic liners. The contract for the service to Toronto has not yet been actually awarded, but will be in a short time. It will give Toronto quick delivery of letter mail to and from Europe. If the Toronto service proves satisfactory it is probable that in another year an extension of it as far west as Winnipeg will be attempted.

Nothing Like It to Relieve Colds In formula and action, Buckley's Mixture is different from all other remedies. It literally "acts like a flash" in conquering coughs and heading the inflamed parts. The instant relief that follows the first dose is multiplied 40 times in a 75-cent bottle. "Buckley's" should be in every home. Your druggist will give you a money-back guarantee. W. K. Buckley, Limited, 145 Mutual St., Toronto 2.

Lead Mining In Yukon

In 1925 the Yukon produced about 2,920 tons of lead or about 2 per cent. of the total Canadian production. Shipments take the form of silver-lead ores and concentrates from the Mayo District.

HERCULES PERMANENT BUILDING PAPER

IT TAKES A SHARP BLADE

Healthy beards can be removed most easily with a sharp blade. So, too, can Hercules Permanent Building Paper be cut. It doesn't tear easily.

For this reason alone, carpenters and builders prefer Hercules. When using, handle it as roughly as you like. Hercules will not tear or crack. Hercules allows greater speed in using.

For various purposes, Hercules is made in three grades—x light, xx medium, xxx heavy. All grades are tested and proven wind proof and damp proof. A sample gladly sent on request.

News Notes

Fred Piepgrass has purchased a new Chevrolet light delivery from Graham Motors.

Mr. Erickson, of Welling, has purchased a new Chevrolet coach from Graham Motors.

Threshing was again delayed by the snow storm this week.

Willis Christensen has purchased a new International truck.

R. Wm. Pilling and W. H. Steed, oil men, drove through here last Wednesday in an Auburn straight eight enroute to Calgary.

Lee Brewerton is all ready to open up the Rex theatre bookings in the Opera House May 1.

Lee Brewerton left on Wednesday for Shelby, from where he and his brother, George, will go to Seattle. The reason of the trip is to secure the very latest ideas in modern theatre construction. Blue prints and plans for the new Rex have arrived and work will probably commence next week.

The Opera House directors are planning to hold a grand night of entertainment at the hall on its opening date about the last of this month. The building has been closed for some time while extensive repairs and improvements are being made. When they are finished the interior will present the appearance of a new building and one that we may be proud of. The ceiling has been covered with metal panelling, walls will be replastered where necessary, the floor will be repaired and scraped to bring out its former dancing surface. The date of re-opening will be announced later.

BORN—to Mr. and Mrs. W. D. Walton of Diamond City a girl, 8½ lbs. At Mrs. Boyson's home. Dr. G. W. Leech in attendance.

Mr. and Mrs. Henry Cornaby will leave here next Monday for Shelley, Idaho, where they will make their future home. Mr. Cornaby was master mechanic at the local sugar factory.

Mr. and Mrs. J. O. Bryant and family will leave here shortly for Idaho where they will reside in the future. Mr. O'Bryant was assistant superintendent at the at the sugar factory here.

T. Geo. Wood left this morning for Calgary to attend the Alberta-Made exhibition.

Seen and Heard

S. B. Card nursing a finger which had been smashed by an oil barrel.

Dick Wolff offering L. D. King \$1300 or nothing on the turn of a card for a used car worth \$650.

Gordon and Lee Brewerton stalled on the road from here to Lethbridge last Tuesday.

Graham Brothers demonstrating a new Frigidaire electric refrigerator.

Pick Your Baseball Team

Has Raymond baseball material? As an answer to that question the list below is published. Pick your team. No doubt we have missed a number as this list was made up in a hurry. There are also a few we might add to the rooters list. Has Raymond baseball material? Just read the names below.

Catchers

Albert Hicken
Brownie Holfson
Paul Dahl
Earl Zemp
Joe McLean

Pitchers

Donny Nilsson
Russ Nilsson
Joe Strong
Cliff Nalder

1st Base

Reed Kirkham
Mike Kosko
Dick O'Brien
Harry Fairbanks
Dick Scott

2nd Base

Lee Brewerton
Roy Stone
Karl Dahl

3rd Base

Leonard Workman
Joe Kirkham
Sid Ralph
Drex Selman
John O'Brien

Short Stop

Cliff Nalder
Allan Weaver
Elmo Christensen

Fielders

Geo. Paris
Brownie Holfson
Karl Dahl
Mutt Ralph
Paul Dahl
Cliff Nalder
Joe Strong
Allen Weaver
Albert Hicken
Reed Kirkham
Czar Fairbanks

Rooters

Bert Kirkham
Tom O'Brien
Ed Hawk.

News Notes

Mr. and Mrs. S. S. Rutt, of Farmington, Minnesota, arrived in Raymond and are guests at the home of E. P. Walscott and sister. Mr. Rutt has sold his interests in Minnesota and intends going into business in Alberta.

A general meeting of the public will be held at the 2nd ward chapel tonight at 7.30, to discuss the new light franchise on which a vote will be taken next Monday.

Mr. M. Harper and Mr. J. J. Diederich, representatives of the Monarch Bond Syndicate Ltd. with the head office at Vancouver, were in town the past week. They are selling bonds by the building or saving association plan, a system now to this country but one long established as practical in other countries.

A Good Seed Bed

What is a good seed bed for sugar beets? "Primarily it is a soil that has been deeply loosened and reduced to a friable condition, free from clods or air pockets".—Dr. O. W. Wilcox.

Study the proper and wrong methods of getting ground ready for beet seed. Seldom can poor preparation of the seed bed be overcome by later work. Have it right to start with.

If mature or crop residues are to be plowed under precede the plow with a double disking. Disk or scarify the surface before any spring plowing. Where live stock have been pastured on ground to be planted to beets, double disk before plowing.

The harrow should follow the plow closely, except perhaps on sandy soils or on land given to blowing. Teeth slanted forward will bring clods to the surface; a Campbell packer or harrow with teeth set straight or a disking will help firm the seed bed.

A good seed bed is the first essential to a 100% germination stand. Some beet crops each season make half or three-fourths of a crop because not a good enough stand is obtained in the first place. —Through the Leaves.

Card of Thanks

Mr. and Mrs. Rulon Dahl wish to express their deep appreciation to their many friends for the sympathy and kindness extended during their recent sad bereavement. And they wish to thank the following for beautiful floral tributes: father and mother; Mr. and Mrs. J. W. Evans and family, Mr. and Mrs. R. T. Graham, Mr. and Mrs. Arthur Dahl, Mr. and Mrs. C. F. Graham, Mrs. Rhoda Nilsson, Mr. and Mrs. Ronda Dahl, Mr. and Mrs. Jas. H. Walker, Mr. and Mrs. H. A. Jones, Mr. and Mrs. Alvin Jones, Mr. and Mrs. L. L. Pack and family, Mr. and Mrs. Paul Dahl, Mr. and Mrs. Ross Salmon, Mr. and Mrs. Theo. Olsen, Mr. and Mrs. Clifford Dahl, Mr. and Mrs. Melvin King, Mr. and Mrs. Owen King, Mr. and Mrs. Wm. Anderson, Mr. D. L. Galbraith and family, Mrs. D. H. Kinsey and Mrs. Geo. Paris, Grace, Beatrice and Dorothy Nurse, 2nd ward Sunday School, 2nd ward Gleamer Girls, 2nd ward Mutual officers, Miss Geneva Duce, stake Y. M. and Y. L. M. I. A., U. F. W. A., stake Relief Society, Mrs. Deardon and Mrs. Jos. McLean.

Nielson Promoted

Howard Fairbanks, of the Bank of Montreal staff, Lethbridge, has been transferred to the Raymond branch and will arrive shortly. It is presumed that Arvin Nielson, teller here, will receive a promotion by transfer to another branch within the next few days. Mr. Fairbanks, it will be remembered, was a member of the Aces basketball team, and played 3rd base on the Cardston baseball team some years ago. We can use him here. Mr. Nielson will be missed on the personnel of the collegiate orchestra and in baseball circles to say nothing of various other social activities. During his stay here he has become one of Raymond's most popular young men. He has been a shining light on the local tennis court and as a member of the Sheik's hockey team. He will undoubtedly go far in his chosen profession.

FOR SALE—Good work horses from 1600 to 1800 lbs. 3 to 8 years old. See G. B. Taylor on N. Y. Taylors ranch 4 miles north of Raymond. A 21
